

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

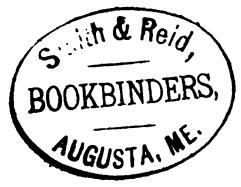

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PART I.

STATE OF MAINE.

To Honorable E. C. Burleigh, Governor of Maine:

The Board of Railroad Commissioners respectfully submit their thirty-third annual report as required by Section 114 of Chapter 51 of the Revised Statutes.

By reason of an amendment of the statute, relating to annual returns of railroad corporations, which requires that they shall cover the year ending June thirtieth, instead of September thirtieth, as formerly provided, the abstract of returns hereinafter published, includes three months of time embraced in the returns of the previous year, though this report, as heretofore, is for the full year ending November thirtieth, 1891. Hereafter all the returns will be for the twelve months ending June thirtieth.

This change has been made in order that the statute shall conform to the rule of the Interstate Commerce Commission and to the statutory requirements of other states.

Its object is to save railroad corporations the trouble and expense of preparing returns ending at different times, for the several states, in which their respective roads may be located, and for the Interstate Commerce Commission.

RAILROAD TRANSPORTATION AND EARNINGS.

Owing to the change in time of making the annual returns above mentioned, a comparison of the transportation and earnings of railroad corporations during the past year, with those of former years, cannot be definitely made; but, taken

as a whole, compared with former years, they show a gratifying increase in business and net earnings.

September 30, 1880, the steam railroad mileage, in Maine, was 977.07 miles. On June 30th 1891, the mileage of railroads was 1382.92 miles, an increase of 405.40 miles.

The gross transportation earnings, for the year ending September 30, 1880, were \$3,647,364. For the year ending June 30th 1891, the gross earnings were \$7,012,778.92,—an increase for the year, over 1880, of \$3,365,574.72. In 1880, the total number of passengers carried was 3,174,626. In 1891, the total number carried, was 5,502,646,—an increase of 2,334,220.

In 1880, the number of tons of freight carried, was 1,300,158.

In 1891, the number of tons carried, was 10,389,420,—an increase of 9,089,262 tons.

The number of passengers carried one mile, in Maine, in 1891, was 120,523,000. The number of tons of freight carried one mile in 1891, was 252,100,721.

The mileage of street railroads, September 30, 1880, was 6.75 miles, and the number of passengers carried was 343,510, and the net earnings as reported, were \$46,610.34.

The mileage of such railroads June 30, 1891, was 51.64 miles.

The number of passengers carried was 5,113,358, a gain over that of 1880, of 4,270,047, and an increase of earnings to the amount of \$218,710.36.

The figures above given show a vast increase in transportation and traffic by railroads, during the past ten years, and clearly indicate a healthy growth in the business enterprises and financial prosperity, not merely in railroad properties, but of the public at large.

PHYSICAL CONDITION OF RAILROADS.

During the past year the Board has made careful inspections of all the tracks, bridges, viaducts and culverts of rail-

roads within the state, as required by law. Preparatory to such examination or inspection, the Board, by circular, requested corporations operating railroads within the state to furnish them, a list of all bridge structures, and openings of more than six feet in width, on the line of such railroads, as follows:

To

Manager Railroad.

DEAR SIR: The Board of Railroad Commissioners of Maine desiring to be informed as to the name and character of each and all bridges and open culverts on the above named railroad, respectfully request you to cause the inclosed blank sheet to be filled out and returned to the Board at Augusta, on or before April 1, 1891.

Respectfully yours,

. Clerk of the Board.

. RAILROAD.

BRIDGES AND OPEN CULVERTS IN THE STATE OF MAINE.

Mileage from	Name.	No of Spans	Thro' or Deck.	Form of Truss.	Wood or Iron	Angle with Stream or Road	Length of Spans	Opening in Clear.	Date of Erection.	Name of Builder.	Remarks.
--------------	-------	-------------	----------------	----------------	--------------	---------------------------	-----------------	-------------------	-------------------	------------------	----------

In response to these circulars, all the railroad corporations made a return giving in detail the information requested, but in some instances not with sufficient accuracy, as the Board has since found on inspection, to be entirely reliable. However it has enabled the Board to lay a foundation for a more perfect and reliable knowledge, and the keeping of a more accurate record in regard to such in the future.

Section 114 of Chapter 51 R. S. provides that "A majority of the Board, annually, between the first of April and October, and at any other time, on application or whenever they think it necessary, shall carefully examine the tracks, rolling stock, bridges, viaducts and culverts of all railroads; shall give a certificate thereof to the clerk of the corporation,

therein stating the condition of the road and rolling stock and shall annually in December, make a report to Governor, of their official doings, with such facts as they deem of public interest or which he may require."

The certificates required by the foregoing section, were made and issued to the several railroad corporations, the seventeenth day of November last, copies of which are printed in Part II, of this report. These certificates specifically show the physical condition of each road and its rolling stock as found by the Board, on the date of their issue.

METHODS OF HEATING CARS.

The several methods of heating passenger, mail and baggage cars, mentioned in our last report, are still in use, though the use of steam from the locomotive, is fast becoming general.

Heretofore this Board has by approval, permitted the use of certain heaters, other than common stoves, which received the approval of Railroad Commissioners of Massachusetts and New Hampshire for the reason that our system of railroads, was so connected with those of the states mentioned; but learning that by legislative enactments and action of the Boards of Commissioners of those states, that such methods would not be approved after a certain date, the Board on the first day of September last issued and delivered to the several railroad corporations the following circular:

METHODS OF HEATING PASSENGER, MAIL AND BAGGAGE CARS.

Section 1 of Chapter 275, Public Laws of 1889, provides as follows:

"No passenger, mail or baggage car, on any railroad in this State shall be heated by any method of heating, or by any furnace or heater unless such method or the use of such furnace or heater shall have been approved in writing by the Board of Railroad Commissioners;" * * * * "and that in no event shall a common stove be allowed in any such car."

Evidently the Legislature intended by enacting the foregoing provisions of law, to reduce so far as possible the danger to passengers, in case of accident to trains.

This Board in their report of 1890 said :

"In obedience to the provisions of Chapter 275 of the Public Laws of 1889, railroad corporations have generally discarded the use of what would reasonably be termed common stoves, for heating passenger, mail and baggage cars, and steam direct from the locomotive, has been generally substituted as a means of heating, though other methods of heating but little safer than the common stove, are still in use on many railroads in this State. While this fact would seem to be a violation of the provisions of the statute, which is being permitted by the Board, we can only give as an excuse the one we gave in our last annual report," viz :

"The Board, upon investigation, found that a statute, similar to the one enacted in this State, had been in force in the states of Massachusetts and New Hampshire, and that the Railroad Commissioners of those states had approved all methods of heating cars, other than by what might be called 'common stoves.' "

Feeling, however, that the most stringent regulations should be adopted to provide for the safety of passengers, and to comply with the spirit of the law, and inasmuch as improvements have been made in some of the devices for heating cars now in use, the Board hereby give notice to all railroad corporations operating railroads in this State, and to all manufacturers of car heating devices, that after the expiration of the time limit of the approvals now in force, viz : June 30, 1892, no method of heating cars will be approved, which, in the opinion of the Board, will not reduce the danger by fire, to passengers and employes, to a minimum."

LEGISLATION.

During the past session of the Legislature, but little legislation respecting railroads was enacted. The spirit of animosity to railroad corporations and their management which prevails among the people of the South and West, and which has culminated in the enactment of the Interstate Com-

merce Law and much adverse legislation in several states has not, to much extent, prevailed in Maine.

True, several isolated attempts have been made by introduction of bills, looking to the control of rates and traffic of railroads by the state, through a commission, none of which, however, have received favorable consideration by law-making power.

It is doubtless true that in many parts of the country feeling of opposition to railroad corporations, has arisen account of despotic and unwise management of such corporations; but so far as this Board is informed, such conduct can not truly be attributed to railroad corporations operating roads in Maine.

Since the enactment of the Interstate Commerce Law revision of rates and charges to comply with some of its provisions, viz: those relating to pooling, long and short haul etc., became necessary. In making such revision of rates railroad corporations doubtless found many difficulties.

A large portion of the railroads of Maine, is along the coast and navigable rivers, and is to a great extent, affected by sea at many points in direct competition with lines of steamers and other crafts, upon which the law imposes no limitations or restrictions. The attempt by some railroad corporations to fix and adjust rates to comply with the provisions of the law aforesaid, and at the same time compete with the water lines above mentioned, caused, for a time, murmurings from non-competing points. These difficulties, however, have in some manner been overcome, and so far as this Board is informed, the rates charged by railroads are generally satisfactory.

Section 9 of Chapter 51 of the Revised Statutes of Maine, relating to corporations organized and incorporated under the general law, is as follows:

"Said corporation may establish and collect such tolls for the transportation of passengers and freight over its road as the directors deem fair and reasonable, and shall have a license on its freight therefor; but upon what shall, at any time,

deemed by the Railroad Commissioners, a sufficient complaint, by interested and responsible parties, that the tolls are unreasonably high, said Commissioners may revise and establish them, after due notice and hearing, for a time not exceeding one year. But the Commissioners before directing said hearing, shall give opportunity to the company complained of, to reply to the charge."

Since the enactment in 1876 of the above quoted statute, several railroad corporations have been organized and have constructed and operated railroads in this state. These, we are pleased to state, have been operated in such manner that no complaint has yet been made to this Board, that the tolls or charges were unreasonably high.

That the state has the right and ought to exercise supervision over railroads, to a reasonable extent, no one will doubt; the right to interfere with, and to regulate the tariff rates of Common Carriers, who have unusual powers conferred upon them by the state, cannot be expected to be relinquished, but the constant agitation and interference, without adequate cause, we believe has a tendency to embarrass the operations of railroads, and frighten capital from seeking investment in railroad improvements and building in the state, thereby hindering and retarding the prosperity of the business interests of our people.

But the wisdom of taking from railroad corporations the right to establish and collect such tolls for the transportation of passengers and freight as managers of such railroads deem fair and reasonable, and confer it upon Boards appointed by the state, as has been attempted in many states, has been questioned by majorities of legislators of this state, even though their charters may not protect them against absolute control by the state authorities in such matters.

We, too, believe that directors and managers of a railroad, with their knowledge of its cost of construction and maintenance, its incomes and necessary disbursements, its location and connections, etc.,—all of which are essential in determin-

ing what are and what are not reasonable charges,—are better judges than any commission can be, however constituted. Investors in these railroad properties are entitled to a reasonable income from the money invested.

The policy of the state in the past has been to encourage the building of these roads. Towns and cities in their corporate capacity have subscribed to the stock and have in many instances extensively loaned their credit. During the present session of the Legislature, even counties were by law of this state, permitted to loan their credit to promote important railroad enterprises.

Would people invest in these enterprises or favor such investments, if they had reason to believe that the right to fix and regulate rates for transportation, within reasonable limits, was to be taken from them by the state, and entrusted to some commission endued with power to take charge of the whole matter of rates, and perhaps without regard to the capabilities, wants and interests, of the territory to be supplied with railroad service, or the amount expended in constructing and maintaining these roads, to fix such rates upon the value, as estimated by such commission or Board of Commissioners, or upon some other arbitrary rule? Surely private capitalists would have supplied the necessary money to establish and maintain lines of railroad that have been built in the past; nor would they now furnish it to promote two important enterprises hereinafter mentioned, that the people in this state now most desire, if they believed such policy was to be inaugurated in the future.

From the commencement of the agitation, which culminated in the enactment of the Interstate Commerce Law, by the National Government, to this time, we have believed that attempts by the National Government or individual states, to regulate and control the passenger and freight traffic on railroads, through or by commissions, was unwise, and that the results of such legislation would be detrimental to the true interests of the people.

That the enactment of some of the provisions of that law, has not resulted more disastrously to the commercial interests of the country is, we believe, to be attributed to failure or inability to enforce the same, by the Interstate Commerce Commission.

In many of the Southern and Western states, extreme legislation looking to the management and control of traffic on railroads, by state commissioners, has been enacted. In the New England States, we are pleased to state, Legislatures have been more conservative. Whether owing to this fact or from some other cause or causes, it is stated on good authority, that in New England, in 1888, the average rate of dividends paid on shares of railroad stock, was four dollars and fifty-six cents, while in the West, the same year, the average amount paid was only fifty-two cents per share. In closing this subject, we cannot but express the opinion that if statesmen and legislators would devote more time and attention to the enactment of laws tending to promote efficiency in railroad management, and the better security of the lives and limbs of travelers and employes on railroads, their services would be better appreciated, than if devoted to the enactment of laws to regulate and control commerce.

NEW RAILROADS.

During the past year the Portland and Rumford Falls Railway, a Corporation organized under general law, (Articles of Association for the same having been approved by the Railroad Commissioners December fourth 1890), have acquired by lease, possession of the line of railroad extending from Mechanic Falls to Canton hitherto known as the Rumford Falls & Buckfield Railroad, and have operated the same since July first 1891.

By an Act of the legislature, approved February 10th 1891, this company was authorized to "construct and maintain its railroad over the whole, or any part or parts, of the line over which the Rumford Falls and Buckfield Railroad Company is now authorized by law to construct a railroad."

The lease by the Portland and Rumford Falls Railroad, franchises and property of the Rumford and Buckfield Railroad Company" was also approved by act.

Under and by virtue of the rights thus obtained, measures were at once taken, looking to an extension of the road from its present terminus at Canton, along the western shore of the Androscoggin river to Rumford Falls, in the town of Rumford, a distance of about fifteen miles. Ground broken in October, and the grading and masonry work pushed with vigor. The favorable condition of the weather has rendered it possible to so far complete the above mentioned work that it can safely be expected the road will be completed early in the summer of 1892. At Rumford Falls, the terminus, large sums of money have been, and are being expended in improving the great water power at that place. One Pulp Mill is in process of erection, which promises to give the railroad fifty tons of paper daily for transportation. Plans are already made for the building of other mills.

There seems to be good reason to believe that the building of this extension will be the means of promoting large business interests in that section of the state.

BANGOR AND AROOSTOOK RAILROAD.

The Bangor and Aroostook Railroad Company was organized under the general laws of the State, February 13th, 1860, for the purpose of building a railroad of standard gauge from Brownville in the County of Piscataquis, into and through the County of Aroostook via Houlton and Presque Isle and Caribou, with branches from Dyer Brook Plantation or vicinity to Masardis and Ashland; and from Easton to Fort Fairfield, in all about 200 miles. This line as proposed will make accessible the water powers of the East and West branches of the Penobscot river.

It will also give opportunity to open up the agricultural lands in and about Patten and Sherman. By the building

this road on the route above mentioned, the valuable Pulp Wood, and other timber lands will be brought within reach of lumbermen, thereby making a market for that class of lumber.

The promoters of this enterprise have in view, not alone the relief of the people of Aroostook County, who have for a long time desired increased railroad facilities, but of establishing a first class 'Trunk Line' into and through the heart of undeveloped North Eastern Maine. The Capital Stock of the road is \$1,050,000, and the legislative limit of Preferred Stock is fixed at \$1,100,000, of which Aroostook County has subscribed \$500,000, and about \$400,000 additional has been taken by individuals. The company desire to have \$1,000,-000 subscribed before attempting further negotiations.

The surveys from Brownville to Caribou, via Houlton and Presque Isle were completed early in December, and since then have been pushed northward toward Van Buren. It is hoped to have the surveys to Fort Fairfield and Ashland completed before winter compels its discontinuance. We understand that the engineer in chief, reports a good line all the way with light grades and curves

MAINE SHORE LINE RAILROAD.

The Act incorporating the Maine Shore Line Railroad Company, approved March 2, 1881, was further amended extending the time for the location, and construction, and for other purposes, by Act approved January 24, 1883; and was further amended, extending the time for location, and providing for the location of the draw-bridge at Taunton Bay by Act approved March 20, 1891.

An Act approved March 20, 1891 authorized the County of Washington to guarantee the interest upon \$650,000 of the first mortgage bonds, under certain conditions. By the assistance of the above mentioned Act, the projectors have expected to soon commence the construction of the road. The Board of Railroad Commissioners are not informed as to

the progress made in that direction, and therefore can give any particulars relating thereto.

SKOWHEGAN AND NORRIDGEWOCK RAILROAD.

The charter for the Skowhegan and Norridgewock Railroad was granted in 1889, and the company organized July 1891. It will connect with the Maine Central Railroad at Skowhegan, and the Somerset Railway, at Norridgewock. The length of the road is about five and one-half miles; route being along the north side of the Kennebec river. We are officially informed that the working survey was made in October, and that the directors have advertised for proposals to build the road; that the Maine Central Railroad Company has made a proposition to the company to lease the road upon terms which have been accepted by it. The directors hope to get the road under contract, and have it built during the coming summer.

TRAIN SERVICE, STATIONS ETC.

Much has been done within the past few years, by railroads, corporations and managers, in improvements in train service, to promote the comfort and convenience of travelers on the roads. Much more roomy and attractive passenger cars are now used than were formerly. Station buildings on nearly all of the principal lines of railroad in the state, have been rebuilt, or repaired and enlarged, and made comfortable and convenient. By the use of the modern methods for heating, if properly cared for, not only a more uniform heat is obtained, but passenger cars can be easily kept neat and clean.

In this connection we desire to especially commend Order No. 661 recently issued by the General Manager of the Maine Central Railroad, to station agents and train men, relative to keeping water closets in stations and passenger cars, free from dirt and objectionable odors. We regret to be compelled

elled to say that, on several railroads in this state, there is a sad want of care in respect to these important matters.

A more perfect system of ventilation of passenger cars is still much needed. The lack of automatic regulation of the systems of steam heating, and the neglect of trainmen whose duty it is to care for same, often causes passenger cars to be over-heated, and, with the ordinary systems of ventilation, the air soon becomes vitiated and oppressive. To obtain fresh air, passengers are too frequently compelled to open car windows, which are so constructed, that, while those who open windows may obtain temporary relief, an additional discomfort is thereby forced upon those who unfortunately sit behind them. The comforts, conveniences and even luxury that now surround those who journey by rail, is more keenly appreciated by older travelers than by the rising generation ; and but for the want of a more perfect system of ventilation and regulation of temperature in cars, former discomforts of travel by rail, would be largely overcome.

At the present time, no uniform style of construction of passenger cars is adopted or adhered to, and everything connected with ventilation of cars, is apparently in an experimental stage ; no uniform method seems to have been approved or adopted.

We trust that these subjects will receive more attention from railroad managers in the future, and that uniform and approved methods of heating and ventilating passenger cars will soon be adopted.

ACCIDENTS.

The returns from the various railroads operated in this state, show a remarkable freedom from fatal accidents to passengers. Out of the 5,502,646 passengers carried on steam railroads in Maine only one was killed and only five injured,—and out of the 5,113,358 passengers carried on electric and other street railroads, only one passenger is reported as injured.

As will be seen, by the special reports hereinafter presented, two serious accidents to passenger trains occurred on the Boston & Maine Railroad system during the year, but happily only one person was killed, and though some employees were more or less hurt, no passenger received any material injury. These two accidents were, as this Board found on investigation, attributable not to any defect or want of repair in the rolling stock, but mainly to the carelessness of employees.

A series of rear-collision accidents, such as these, occurred throughout the country during the past year and are apparently increasing in number each year. Probably the cause of all or nearly all of these accidents, was carelessness on the part of operatives or employees. If that be true, it is a lack of care on the part of railroad managers, in selecting competent men, and properly training and fitting them to discharge the important duties necessarily entrusted to them. The lives of the traveling public ought not to be entrusted to the care of men who are employed through favoritism, or for the reason that they may be willing to work for a low rate of wages.

As we have said in a former report, we believe that it is important to secure efficiency of trainmen and other employees on railroads by a system of grading in each department, and promotion from these and to other departments, based upon careful examinations and as a reward for care and faithfulness and competency shown, should be made. As a means of stimulating men in these respects, a corresponding rate of compensation should follow each promotion. We are confident that, if such a policy should be adopted by railroad corporations, greater efficiency would be secured. We too believe that the lack of uniformity in rules and regulations for the movement of trains throughout the country, that ought not to exist, that a set of general rules, that would be applicable to the movement of trains on all railroads, should be agreed upon and adopted. Were this done, trainmen would receive uniform education and training that, when once acquired,

would be lasting and beneficial to them, and which, we think, would tend to make them more efficient wherever employed.

The following table shows the number and apparent cause of all accidents occurring on railroads in Maine, during the year ending June 30, 1891 :

RAILROAD COMMISSIONERS' REPORT.

ACCIDENTS IN MAINE.

During the Year Ending June 30, 1891, the Following Accidents Occurred on Railroads in Maine:

Special Report of the Board, relating to an accident on the Boston and Maine Railroad at Scarboro Beach Station

Special report of the Board of Railroad Commissioners, relation to an accident on the Western Division of the Boston & Maine Railroad, at Scarboro Beach Station, on Thursday the 22d day of January, 1891.

Hearing at Augusta, at office of the Board, January 27 and February 10, 1891.

As appears from the evidence elicited at the hearing, the Kennebunk local train, No. 154, which leaves the Union Station in Portland, at 10.15 A. M., consisted of a locomotive and two cars as follows:

Passenger car No. 71 and a combination smoking and baggage car No. 19. As the train was made up, the passenger car was next to the locomotive, and the combination car in the rear.

This train, which was in charge of conductor Charles Cousins, on the morning of the accident, left the station in Portland about two minutes late; but arrived at the station where the accident occurred, on time. Just as this train came to a stop at the station, a locomotive was seen approaching from the rear, at a rapid rate of speed, on the same track, which before an alarm could be given, plunged into the rear end of the forward and combination car above mentioned, and as far into said car as the forward drivers, which accident caused the death of one and injury to several other passengers. The end of the combination car used for baggage, being in the rear, as a result of the accident was not so appalling as it otherwise would have been. Few, if any, passengers were, at the time, in the combination car, and for that reason the loss of life and injury to passengers was very much lessened. The locomotive which ran into the train, as above stated, as appears, was being run by R. B. Bonney, an engineer, who with F. Field Tuttle as conductor, were under orders running with

from Portland to Biddeford, to do shifting there during the day.

It also appeared in evidence that said Bonney had been for many years in the employ of the company, and had been specially connected with the train running to and from Portland to Kennebunk, and had, on the morning of the accident, drawn with his locomotive from Kennebunk to Portland the same train, into which he then ran. That such an accident, as is above described, should occur in broad daylight, is inexcusable and cannot be attributed to any cause other than gross carelessness on the part of some one.

It appears that four persons were on the locomotive, which did the injury, viz: R. B. Bonney, engineer, F. Tuttle, a conductor, Charles A. Fickett, a brakeman, and Charles E. Fisher, fireman. It also appears to have been customary for Mr. Bonney, as engineer, after bringing in the morning train from Kennebunk to Portland, to receive orders to run wild to Biddeford to do shifting; that usually they have preceded train No. 154, which leaves Portland for Biddeford at 10.15 A. M.

On the morning of the accident, an order was delivered to Mr. Tuttle as conductor, and Mr. Bonney as engineer, in duplicate, which was receipted for by Tuttle at 10.19 A. M. as follows: "Work wild to-day between Portland and Biddeford." This order so far as appears of record, was delivered to both the engineer (Bonney) and the conductor (Tuttle), who was to have charge of the shifting at Biddeford. When said order was delivered, engine No. 11, which was in charge of Mr. Bonney, was at the Maine Central Junction. While there, train No. 154, on its way to Biddeford, was seen to pass, by Mr. Bonney and Mr. Fickett the brakeman above mentioned, who were on engine No. 11, at time of accident. At that time Mr. Tuttle was at the station awaiting orders.

He soon after returned with the above order for which he had receipted, and after delivering to Mr. Bonney the duplicate order, at 10.23 A. M., started, running at a moderate

speed till they reached Scarboro Junction, where, making the usual stop, they proceeded past a blue flag, was there displayed to indicate that a train had passed within five minutes in the same direction. This flag Mr. Bonney says he did not see, as he presumes on account of the beating against the window of the cab; neither was it seen by Mr. Tuttle who was sitting on the opposite side of the cab. After passing the Junction, they proceeded at a rapid rate of speed, till they reached a point about six hundred feet from the Scarboro Beach Station, where train 154 was standing, when the same was seen by Mr. Tuttle who gave an alarm, but too late, as appears, to prevent collision.

There is some discrepancy in the testimony as to what took place on said engine at or about the time the train was seen by Mr. Tuttle.

Mr. Bonney says that before the discovery of the train at the station, he had given the long whistle, indicating that he was to pass the station without stopping; that when he saw the train at the station or when his attention was called to it, he was within two hundred feet of it; that he immediately reversed the engine and put on the brakes; but on account of the rain and frost, the rails were so slippery, the brakes had but little effect; that the engine too, was on account of much wear, not in good condition; that she could not develop steam; that the packing was not good in the cylinder and for that reason steam went through, etc.; that on account of the short distance, condition of track and engine, the speed of the engine was but little slackened, if any, when the collision occurred.

On the other hand, Mr. Tuttle, while not differing in the main facts, said that when about to pass under the highway bridge, which, as appears from measurement to have been five hundred and seventy feet from the place where the passenger train stood, he saw the rear of the train and gave the alarm; that he did not see Bonney do anything to the engine, that he thought a collision could not then be avoided.

been prevented, though the speed of engine could have been reduced one-half; that he noticed the lever, when the accident occurred, was near the center.

It is not at all strange that the testimony of these two men differ as to what actually occurred after the train was seen; neither is it to our minds, of much consequence in determining what was the cause of the accident. From all the evidence elicited, it is evident that if the rules of the company, governing the running of trains, had been strictly complied with and obeyed by those in charge of this wild engine, the accident would not have occurred.

Rule 35 of the Boston & Maine Railroad Company, after giving form of what is called a wild order, is as follows: "Upon this order the train named will run to the station designated as a wild train, keeping ten (10) minutes clear of all regular or special trains."

Rule 34 is as follows: "Keeping clear of trains means for passenger trains to keep clear of other passenger trains full five (5) minutes. Freight and mixed trains to keep clear of Passenger trains full ten (10) minutes, and to keep clear of other freight trains full five (5) minutes. Wild, Extra, and Irregular trains to keep clear of all Regular or Special trains full ten (10) minutes. Special trains will have only the rights given in printed notices. Trainmen must not construe this rule into keeping clear of the trains only, but must keep clear of the time table time the specified number of minutes."

If the words "keeping clear" mean anything, they mean keeping clear of all trains, no matter which way they may be going.

As we have before stated, train No. 154 did not leave the station in Portland till 10.17 A. M., being on that day, two minutes late in starting, therefore it was probably 10.22 when said train passed engine No. 11, at the Maine Central Junction. The order given to Mr. Tuttle to run wild, was, as appears, received for at 10.19, and at 10.23, notwithstanding the rule above quoted, and the fact that train No. 154 had

been seen to pass, by Mr. Bonney, not more than two miles before that time, they proceeded and ran as above described.

That this was a clear violation of the rule above quoted there can be no doubt, because the time table time of No. 154, at the Maine Central Junction is 10.20 and to fit it at 10.23 is not "keeping clear" full ten minutes as required by said rule.

Whether to do so was a violation of the rule or not a valid excuse can be given by Mr. Bonney, for doing as the evidence shows he did.

He had seen train No. 154 pass; he was aware of the time and the minute when that train was due at each station. Ordinary prudence required that he should be mindful of these facts and act accordingly.

This he fully admits, and gives as his only excuse, having been accustomed to precede that train, he carelessly assumed that he was doing so on that day. While we find no excuse for Mr. Bonney's conduct, and intend to use words that may be construed as a palliation of his carelessness, we cannot but deem Mr. Tuttle, in a large degree, responsible for the accident. He had received the order, had receipted for it,—he knew the time train No. 154 would start.

Whether or not Mr. Bonney was under his control or subordinate to him, while on the locomotive on the way to deford, we are unable to determine; but he was there in the cab with Mr. Bonney,—he saw and knew what Mr. Bonney was doing. If he had not the power to command, it was clearly his duty to have suggested that they were running or nearly so, the schedule time of train No. 154. We, therefore, cannot but conclude that Mr. Tuttle is guilty of carelessness, if not equally so, with Mr. Bonney.

Though we find that the direct cause of the accident was the carelessness of these men, we cannot but believe that the rules for running trains adopted by the company, and the manner in which they are enforced, contributed remotly, if not directly, to the result.

Rule 47 of said company, is as follows: "A blue flag by day, or a blue light by night displayed at a station, indicates that a train or engine has passed within five (5) minutes, bound in the same direction as the approaching train, and trains will proceed carefully keeping a good lookout for trains ahead." Notwithstanding the provisions of Rule 34 above quoted, which provides that "keeping clear of trains means that passenger trains shall keep clear of passenger trains, full five (5) minutes," and that "wild, extra, and irregular trains shall keep clear of all regular or special trains full ten (10) minutes," and further that "trainmen must not construe this rule into keeping clear of the trains only, but must keep clear of the time table time the specified number of minutes," it appears by Rule 47 that trains of any kind, are permitted to "proceed carefully keeping a good lookout, etc." Surely trains following cannot proceed within five minutes, and at the same time keep clear of preceding trains "full ten (10) minutes." So far as appears from the testimony in this investigation, Rule 34, above quoted, is not construed as applying to one train following another. As an explanation of this seeming inconsistency in the rules above quoted, the officers of the company say that a rule requiring trains to keep clear of other trains going in the same direction, ten or even five minutes, has been found to be impracticable, on account of the large number of trains that have to be sent out from Boston to surrounding places, to meet the demands of the public. However that may be, we cannot commend a rule that leaves it discretionary with employes on trains, as to when, and to what extent, they shall obey them.

All rules for the movement of trains, should be definite and explicit, and consistent with one another, and these should be strictly enforced.

D. N. MORTLAND,
A. W. WILDES,
ROSCOE L. BOWERS, } *Railroad
Commissioners
of Maine.*

AUGUSTA, February 13, 1891.

**Special Report of the Board, relating to an accident on
Boston and Maine Railroad, at Kittery Junction,
7th 1891.**

An express train, No. 64, on the Eastern Division of Boston and Maine Railroad, which leaves Portland for Boston at 12.30 P. M., while standing at the station at Kittery Junction, on July 7, 1891, at about 2.14 P. M., was run into by train No. 62, from the Mountain Division of the above named railroad, which train, if on time, leaves Conway Junction at 1.15 P. M. Though the collision was quite severe no person was killed, and, as we are informed, only one was seriously injured.

Train 64, on the day of the accident, was made up as follows: One locomotive, two mail and baggage cars, parlor cars and five passenger cars. Ira C. Hutchinson, Conductor and George W. Dorman, Engineer.

The injury to the train was substantially as follows: The front and rear end of rear car was broken in, frame broke, the flooring, a foot or more inside of door posts, torn but none of the seats in the car were disturbed; the platform of one other car was crushed in, and several of the draw bars were broken. This, aside from the breakage of glass windows and lamp chimneys was all the material damage done.

As appears from the testimony received at the hearing, train No. 64 was running on its regular time-table time, though perhaps two minutes late at Conway Junction, where no stop was made, was on time at Kittery Junction,—arriving there at 2.13, two minutes before the regular leaving time, which is 2.15 P. M.

The point where the accident occurred is on a curve through a deep ledge cut, five or six hundred feet in length, the walls or ledge on both sides of the track twenty or more feet in height above the railroad track. These walls are spa-

by a highway bridge, which, with the walls aforesaid, prevent a sight of the track on the curve for a distance of not more than five hundred feet. The grade slightly descends, for a quarter of a mile, toward the depot at the Junction, where train No. 64 was standing, the rear car of which was within forty-five feet, or thereabouts Southerly from the overhead bridge above mentioned.

On said day train No. 62, from the Mountain Division, was forty-five minutes late at Conway Junction. This train consisted of locomotive and seven cars, two of which were Pullman Parlor cars, which were taken in charge, at that Junction, by Samuel O. Lunt as conductor and Clark P. Roundy as engineer. Conductor Lunt testified that he had orders from the train despatcher, while at Conway Junction to allow train No. 64 to pass, before starting; that train No. 64 passed there at three minutes before two o'clock; that he registered at just two o'clock and then gave a signal to the engineer to start; that the train did start sometime within three or four minutes after train No. 64 had passed that station. These statements are corroborated by the testimony of Engineer Roundy, who testifies that he saw train No. 64 pass the Junction; that he started about three minutes afterward.

He also states that he saw a signal displayed at Eliot (a station on the way where no stop was made), a blue flag indicating that a train had passed within five minutes; that he then slowed up at the grade and had his engine under control, and ran cautiously; that he saw no signal at Butler's crossing; was not looking there; that he usually looked at the signal and target down there (meaning the electric signal); that as he approached the curve, near where the accident occurred, he was not running faster than eight or ten miles an hour; that he first saw the rear of train No. 64, when at a distance of only about three cars length; that at that time he was not running faster than six miles an hour; that the semaphores or electric signals, near Butler's Crossing, were set so as to indicate that the track was clear; that

he did not think he was running on 64's time, though I not looked at his watch after leaving Conway Junction

From the testimony of Austin C. Hayden, Station at Eliot, and that of J. F. Moore, the flagman at B Crossing, it appears that at each place a blue flag was played immediately after train No. 64 had passed. Hayden also testifies that when train No. 62 passed the station at Eliot, it was running at the rate of "twenty miles per hour;" Mr. Moore says No. 62 was running "pretty fast" when it passed the Crossing, "A good deal faster than the train which was running slow." Mr. Hayden also states that No. 64 passed the station at Eliot at three minutes past four and that train 62 passed there at seven minutes past four. Mr. Moore says that 64 passed by the Crossing at 2.15 and that train 62 passed there at 2.13½.

The distance as given in the time table of the Boston & Maine, from Conway Junction to Kittery Junction is nine and seven-tenths miles, and from Conway Junction to Eliot, 4.3 miles.

From the foregoing statement of facts it will be seen that the accident was the result of little less than carelessness, and though serious in its nature, we are pleased to be able to record the fact that it did not result fatal to many passengers and employes on train No. 64. While the evidence shows some palliating facts and circumstances which may, in a degree, tend to distribute blame, which we hereafter mention, we can find from the evidence, no excuse for the conduct of the engineer of train No. 64 on that occasion. Whether or not he was justified in leaving Conway Junction, as directed by the conductor, before the expiration of five minutes after train 64 had passed, is not easy to determine; but having started within three or four minutes afterwards, it was clearly his duty to run his train with extreme caution. Such caution does not appear to have been exercised, nor even ordinary caution. As we stated, the distance from Conway Junction to Kittery Junction is nine and seven-tenths miles. This distance, at the rate of 20 miles per hour, was covered by train 62 in about fourteen minutes.

rate of speed but little short of thirty-six miles per hour. Surely, few miles or even rods could have been covered at the rate of speed described by Mr. Roundy in his testimony.

By the law of this state, it is made the duty of the Board "whenever a serious accident occurs within the state to any passenger or freight train on any railroad, whether any person be fatally injured or otherwise," if the Board or chairman thereof "deem the public interests require it, to cause an investigation to be made," and that "immediately after the investigation, the Board shall make a special report, stating what it finds to be the cause of the accident."

To state abstractly the cause of the accident, would not be a compliance with the provision of law; neither would it meet the demands of the public. The object of providing for such investigations, was not simply to ascertain the manner in which such and such an accident occurred; but to also learn what led to or contributed to the result, so that by change of rules or regulations, or by statute enactments, if necessary, such accidents may be prevented in the future. Travel by railroad, from necessity, must be attended with more or less danger. Comparative safety, only can be expected by those traveling; but one, naturally would feel that while sitting in a car in a train standing at a station, he, for the time, would be comparatively safe. The evidence shows that train No. 64 was at the station at Kittery Junction on schedule time,—it was rightfully there. No other train could be rightfully there at that time. By whose fault, then, was any other train there? Duty to the public and the corporation interested, compels us to say that the evidence shows that the engineer of train No. 62, was at fault, and that his carelessness was mainly the cause of the accident.

1st. Because the rule strictly prohibited him from following the preceding train within five minutes.

2d. Because, having started within prohibited time, he did not run cautiously, but rapidly.

3d. Because he did not consult his watch to see whether or not he was encroaching upon the schedule time of the preceding regular train.

4th. Because he paid little attention to the blue flag displayed at Eliot Station, and did not look to see whether or not, one was displayed at Butler's Crossing.

In justice to Mr. Roundy, it is proper for us to state he claims to be a justification for doing as he did on occasion.

He says that being forty-five or fifty minutes late in leaving from Conway Junction, he was therefore desirous to proceed; that he received notice from the conductor to that, though he knew it to be a violation of the rule to pass sooner than five minutes after another train had passed the rule is frequently violated in order to make up time under the provisions of the rules, he was not obliged to do so; when he saw the blue flag at Eliot, but to run cautiously which he claims he did; that when he arrived at Butler's Crossing, he looked at the electric signals, as his guide indicated the blue flag, as had been his custom; that they indicated that the track was clear and that train 64 had left the station at Kittery Junction, and for that reason, he proceeded with less caution than he otherwise would. To our minds there is much force in these excuses, and were it not for the fact that without consulting his watch, he was far from running on the time table time of the other regular passenger train, these might be ample.

Had he consulted his watch, he would have known with certainty that train 64 had not left the station. By the rules of the company it is provided that "No train shall leave a station, without special orders from the superintendent, earlier than the time named in the time table." So it is, therefore, of his excuse falls to the ground.

Rule 8 of the company, is as follows: "A passenger train following another passenger train must keep not less than (5) minutes, and a freight train following a freight train

less than ten (10) minutes behind that which preceded it, unless time table or special rules require."

Under the provisions of this rule, time is the essential. We find no rule or part of a rule that gave him liberty to start his train till after the other train had been gone at least five minutes.

He was not running by the time table. True, he says he had notice from the conductor to proceed,—this the conductor admits; but he was not thereby required or even permitted to violate the rule as to following another train.

Rule 31 of the company provides that "Engineers in charge of trains, or engines without trains, have the same responsibilities as conductors and will be governed by the same rules." Another rule of the company we find as follows: "A blue flag or a blue light signifies that a train has gone ahead within five minutes, and the train or engine finding this signal displayed must run so as to avoid any accident."

In a former report made by this Board, upon a similar accident or collision on the Western Division of the Boston & Maine, the Board in commenting upon a similar rule to that quoted above, said "We cannot commend a rule that leaves it discretionary with employes on trains, as to when and to what extent they shall obey them. All rules for the movement of trains should be definite and explicit and consistent with one another, and these should be strictly enforced."

We think, if Mr. Roundy has any justification for running his train on that day as he did, it is mainly owing to the provisions of the rule last quoted above. "To run so as to avoid any accident" must be to one who is entrusted with that power, a matter of discretion.

All men are not equally careful or discreet. A rule which permits a blue flag to be passed within five minutes of another train while on the road, and intrusts one with discretionary power "To run so as to avoid any accident," impliedly permits a violation of the rule which requires that a passenger train must keep not less than five (5) minutes behind the one that preceded it.

We think, too, while we find it to be no valid excuse, the engineer may have been to some extent, deceived by electric signals near Butler's crossing.

They indicated that the track was clear. It may be stated by Mr. John W. Sanborn, who acted as counsel for the company in the investigation, that those "signals were put up for the purpose of giving trains notice of another train within five minutes or notice that there was a passenger in the depot at Kittery." To our minds it is of little consequence what the object, in placing them there, may have been. There is no evidence that the engineer had any knowledge of the object, whatever it may have been. It is reasonable to presume that his knowledge of their use, was derived from the printed rule, as follows:

"The electric signals, near Butler's Crossing, will be regarded as follows: When the semaphore arm in the signal is seen to be in a horizontal position, it is a signal of danger and trains and engines will come to a full stop, and then proceed carefully around the curve until the track is seen to be clear. The semaphore arm standing at an angle of 45 degrees in the signal, denotes that the track is clear and right of way for trains and engines to pass."

That these signals should be used for the protection of trains, wherever from, while at the depot at Kittery Junction, there can be but little doubt. The Board therefore, finds that the cause of the accident was the carelessness of the engineer of train No. 62, though to some extent, superinduced by what we deem an imperfect rule, and the regulation respecting the use of the electric signals near Butler's Crossing.

PART II.

Copies of certificates sent to Railroad Corporations
doing business in Maine, showing the con-
dition of the roads and rolling stock,
for the year 1891.

STATE OF MAINE.

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners,

AUGUSTA, November 17, 1891.

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Augusta, Hallowell and Gardiner (Electric) Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

This road is located through the principal streets of Augusta, and along the west side of the county road, via Hallowell, Farmingdale and Gardiner.

The road-bed is fairly well graded and ditched. The track is laid with steel rails, and is in fair line and surface, but could be improved. The grades at Rines' hill in Augusta, and Louden hill in Hallowell, are steep and are somewhat dangerous, as a crossing of the tracks of the Maine Central Railroad, occurs at each of those points.

Bridges, Viaducts and Culverts.

The trestle bridges at Louden hill, and others located at several points along the line of the road, are in good condition, and receive close attention from the officers of the road.

Rolling Stock, Station Buildings, etc.

The cars are new, and of modern style and construction, and are kept in good order.

The company have an extensive car-house, work-shop and power station at Hallowell.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

RAILROAD COMMISSIONERS' REPORT.

STATE OF MAINE.

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners.

AUGUSTA, November 17, 1

We, the undersigned, board of Railroad Commissioners, certify, that during the past year, we have made careful extensions of the track, bridges, viaducts, culverts and rolling stock of the Bangor & Piscataquis Railroad, as required by law, and the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

From Old Town to Milo Junction, the road-bed is in good condition.

The track is laid with steel rails, and is in good line and straight, and is well ballasted. During the past season five hundred new steel rails have been laid between Milo Junction and Blair, leaving only about twenty miles of the old iron rails in the track, which should be renewed at an early day.

The road-bed, between the last named points, is generally ditched and drained, and fairly well ballasted. Fifteen thousand new ties have been laid, and many more are required.

Bridges, Viaducts and Culverts.

The bridges are all wooden structures, and during the past years, several of the more important have been thoroughly repaired, others, particularly the long high trestles between Blanchard and Greenville are receiving needed repairs.

Many new cross-ties are needed on the smaller structures.

KATAHDIN IRON WORKS BRANCH.

Road Bed, Track, etc.

From Milo Junction to Katahdin Iron Works, the road-bed has been improved by widening, ditching and ballasting. The line has been aligned and surfaced, and many new ties laid.

BRIDGES, VIADUCTS AND CULVERTS.

Several of the trestle bridges along the line, and the truss bridge at Hueston stream have been rebuilt, others repaired, and all are in fair condition.

Rolling Stock, Station Buildings, etc.

The rolling stock in use on the main line and branch, is in good order, and the station buildings, while not all new or modern, are fairly good.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

Office of Railroad Commissioners.

AUGUSTA, November 17, 18

We, the undersigned, board of Railroad Commissioners, do certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Bangor Street (Electric) Railway, as required by law, and the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The track of this railway in the city of Bangor, is laid most
the center of the streets or ways on which it is located, and con-
to the grade thereof. It appears to be well constructed, and
maintained in good line and surface. In the city of Brewer
track is located on one side of the traveled way of one of the
thoroughfares of the city, and the grade generally conforms to
of said way.

Bridges, Viaducts and Culverts.

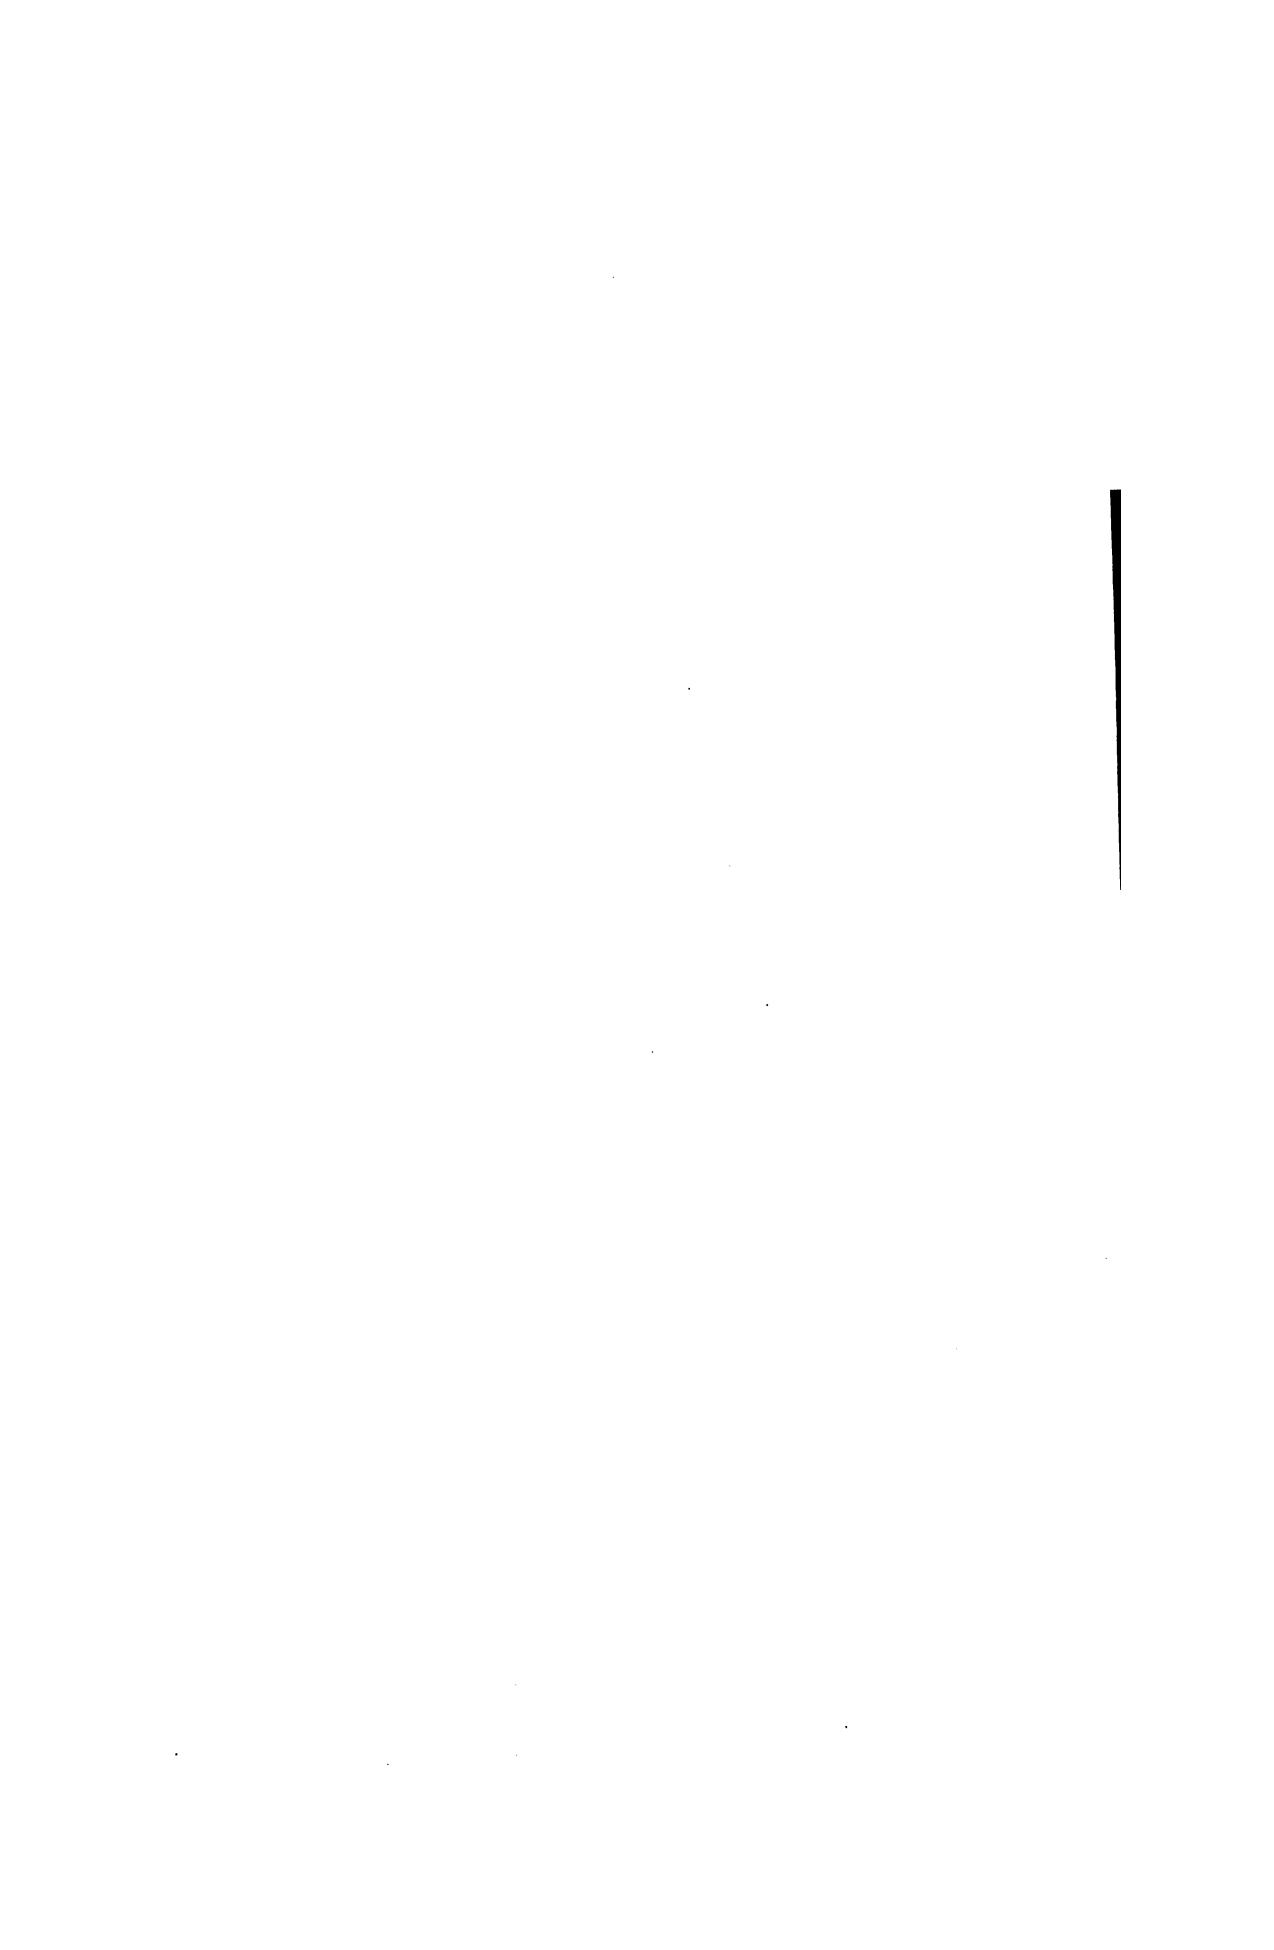

The bridges over which the track passes are those which have been erected and are maintained by the two municipalities mentioned except a trestle and cross timber structure erected by the company in the city of Brewer, which is well constructed and in good condition.

Rolling Stock, Station Buildinys, etc.

The rolling stock is such as is in general use on such roads is in good condition.

In Witness Whereof, we have set our hands this seventeenth
of November A. D. 1891.

of Maine.

BOSTON & MAINE R.R.
Bridge over Oquawka Falls River.

STATE OF MAINE.

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners.

AUGUSTA, November 17, 1891.

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Boston & Maine (Western Division) Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The road-bed is wide, well constructed and kept in good condition, being well ditched, drained and ballasted. The rails are of heavy steel, and are in good line and surface. The ties are, in the main, sound and good; the usual number of new ones having been laid the past year.

Bridges, Viaducts and Culverts.

With the exception of the long wooden trestles across Fore, Nonesuch and Scarboro' rivers, the bridge superstructures are of iron, and many of them are of the most approved design and of recent construction. The masonry which includes several finely constructed arches, is first class. The small openings and water ways are generally spanned by iron I beams. During the past year a new floor system of hard pine timber closely spaced has been put upon the long iron bridge across the Saco river.

EASTERN DIVISION.

Road Bed, Track, etc.

What has been said with regard to the road-bed, track, etc., of the "Western Division", can truly be said of the Eastern Division. This road known for many years as the Portland, Saco and Portsmouth Railroad, was originally well located and constructed. It was one of the first roads built in Maine, and has always been well maintained.

BRIDGES, VIADUCTS AND CULVERTS.

Many of the bridges are first class iron structures, others are finely constructed stone arches. The long wooden pile bridge at

Portland is maintained in good condition, and the wooden bridge between Kittery and Portsmouth receives the constant care of men employed for that purpose. The two trestle bridges across Great Works river, while in fair condition, are not in keeping a first class road.

NORTHERN DIVISION.

Road Bed, Track, etc.

Less than three miles of this road are within the limits of M. The road-bed, track, etc., is in fair condition.

A fine plate girder resting upon first class stone abutments spans Great Works river. The wooden bridge at Salmon Falls, 1 showing no signs of weakness, has been in use many years and probably soon need to be superseded by a more substantial struc

KENNEBUNK & KENNEBUNKPORT BRANCH, BOSTON & MAINE RAILROAD.

Road Bed, Track, etc.

This road has been under lease to the Boston & Maine Rail Corporation since its construction. It has been much improved during the past year. The road-bed is fairly well ditched, drained and ballasted, and the track is in good line and surface. The rails are of steel and the ties are in fair life.

BRIDGES, VIADUCTS AND CULVERTS.

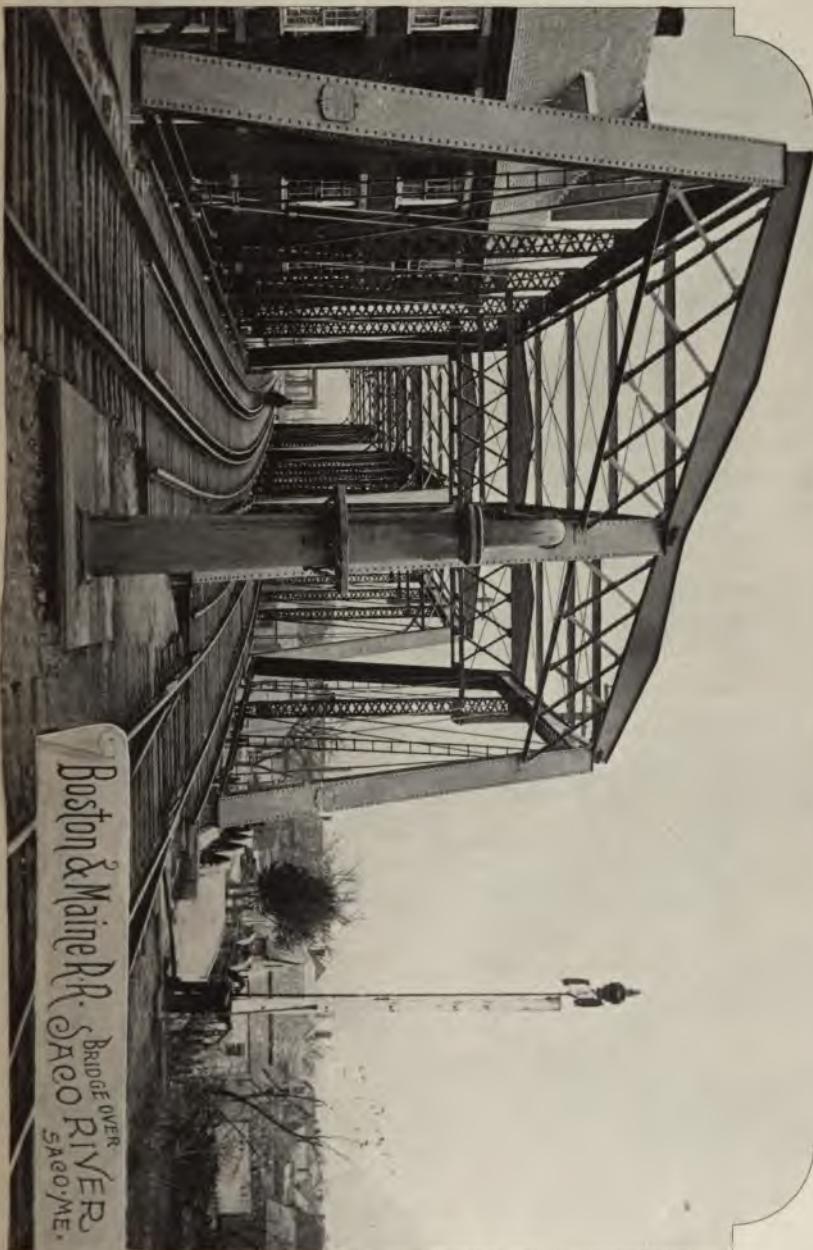

Heretofore the bridges on this branch have consisted of five structures of an aggregate length of twelve hundred and thirty-eight feet. During the past year four of these have been filled with earth and the fifth is now being filled.

Rolling Stock, Station Buildings, etc.

The rolling stock is generally first class and maintained in good condition. The station buildings are in the main modern in style and convenient in arrangement and well suited to the requirements of their several localities.

In Witness Whereof, we have set our hands this seventeenth of November A. D. 1891.

Office of Railroad Commissioners.

AUGUSTA, November 17, 1891.

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Biddeford & Saco Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

This is a street railroad extending from Biddeford to Old Orchard, and has hitherto been operated by the use of horses, although it is now being changed to an electric road. The road-bed and track is in good condition.

Bridges, Viaducts and Culverts.

There are no bridges on the road except ordinary highway bridges which are maintained by the several municipalities.

Rolling Stock, Station Buildings, etc.

The rolling stock is comparatively new and is in good condition.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners.

AUGUSTA, November 17, 1891

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Bridgton & Saco River Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The Bridgton & Saco River Railroad, though a narrow gauge road, was originally carefully located and well constructed. The road-bed is of good width and fairly well ditched and drained. The line passes through a section of country, in which an abundant supply of gravel and other material necessary for the construction and maintenance of its road, is at hand. During the past season many depressions in the road have been raised, and the grades in many places much improved and lightened. The track is well ballasted. Many new ties have been laid, but more are needed in places, to insure a good track throughout.

Bridges, Viaducts and Culverts.

Much has been done by way of renewals and repairs upon bridge structures, viaducts and culverts. The long trestle bridge heretofore existing at Wood's pond, has disappeared, and in place thereof, earth embankments and substantial stone abutments have been erected on each side of the stream, which is spanned with good southern pine stringers. A stone culvert now takes the place of the old trestle at Back Nipping, so called.

The trestle over Hancock brook, has been largely renewed and materially strengthened, and many other improvements and repairs have been made which we do not deem necessary to mention in detail.

Rolling Stock, Station Buildings, etc.

The rolling stock is ample for the requirements of the traffic. It is mostly first class and kept in good repair and condition. The

station buildings are convenient, and during the past season the platforms at many places have been repaired and enlarged, and the station buildings painted in attractive colors.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

D. N. MORTLAND,
A. W. WILDES,
Roscoe L. BOWERS. } Railroad

STATE OF MAINE.

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners.

AUGUSTA, November 17, 188

We, the undersigned, board of Railroad Commissioners, do certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Canadian Pacific Railway as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

This line of railway, the location of which was a triumph of engineering skill, is remarkably well located and constructed. The excavations or cuts, and the embankments are of good width, throughout, the road-bed is well ditched and drained. The alignment and track adjustments are well nigh perfect.

Bridges, Viaducts and Culverts.

Many of the wooden structures on the line of the Canadian Pacific Railway, while substantially constructed, are intended to be temporary, and at an early day will be replaced with stone and masonry structures. All of the permanent superstructures so far erected are of the most approved design and are substantially constructed of steel and iron, resting upon abutments and piers of first class masonry.

AROOSTOOK RIVER BRANCH.

Road Bed, Track, etc.

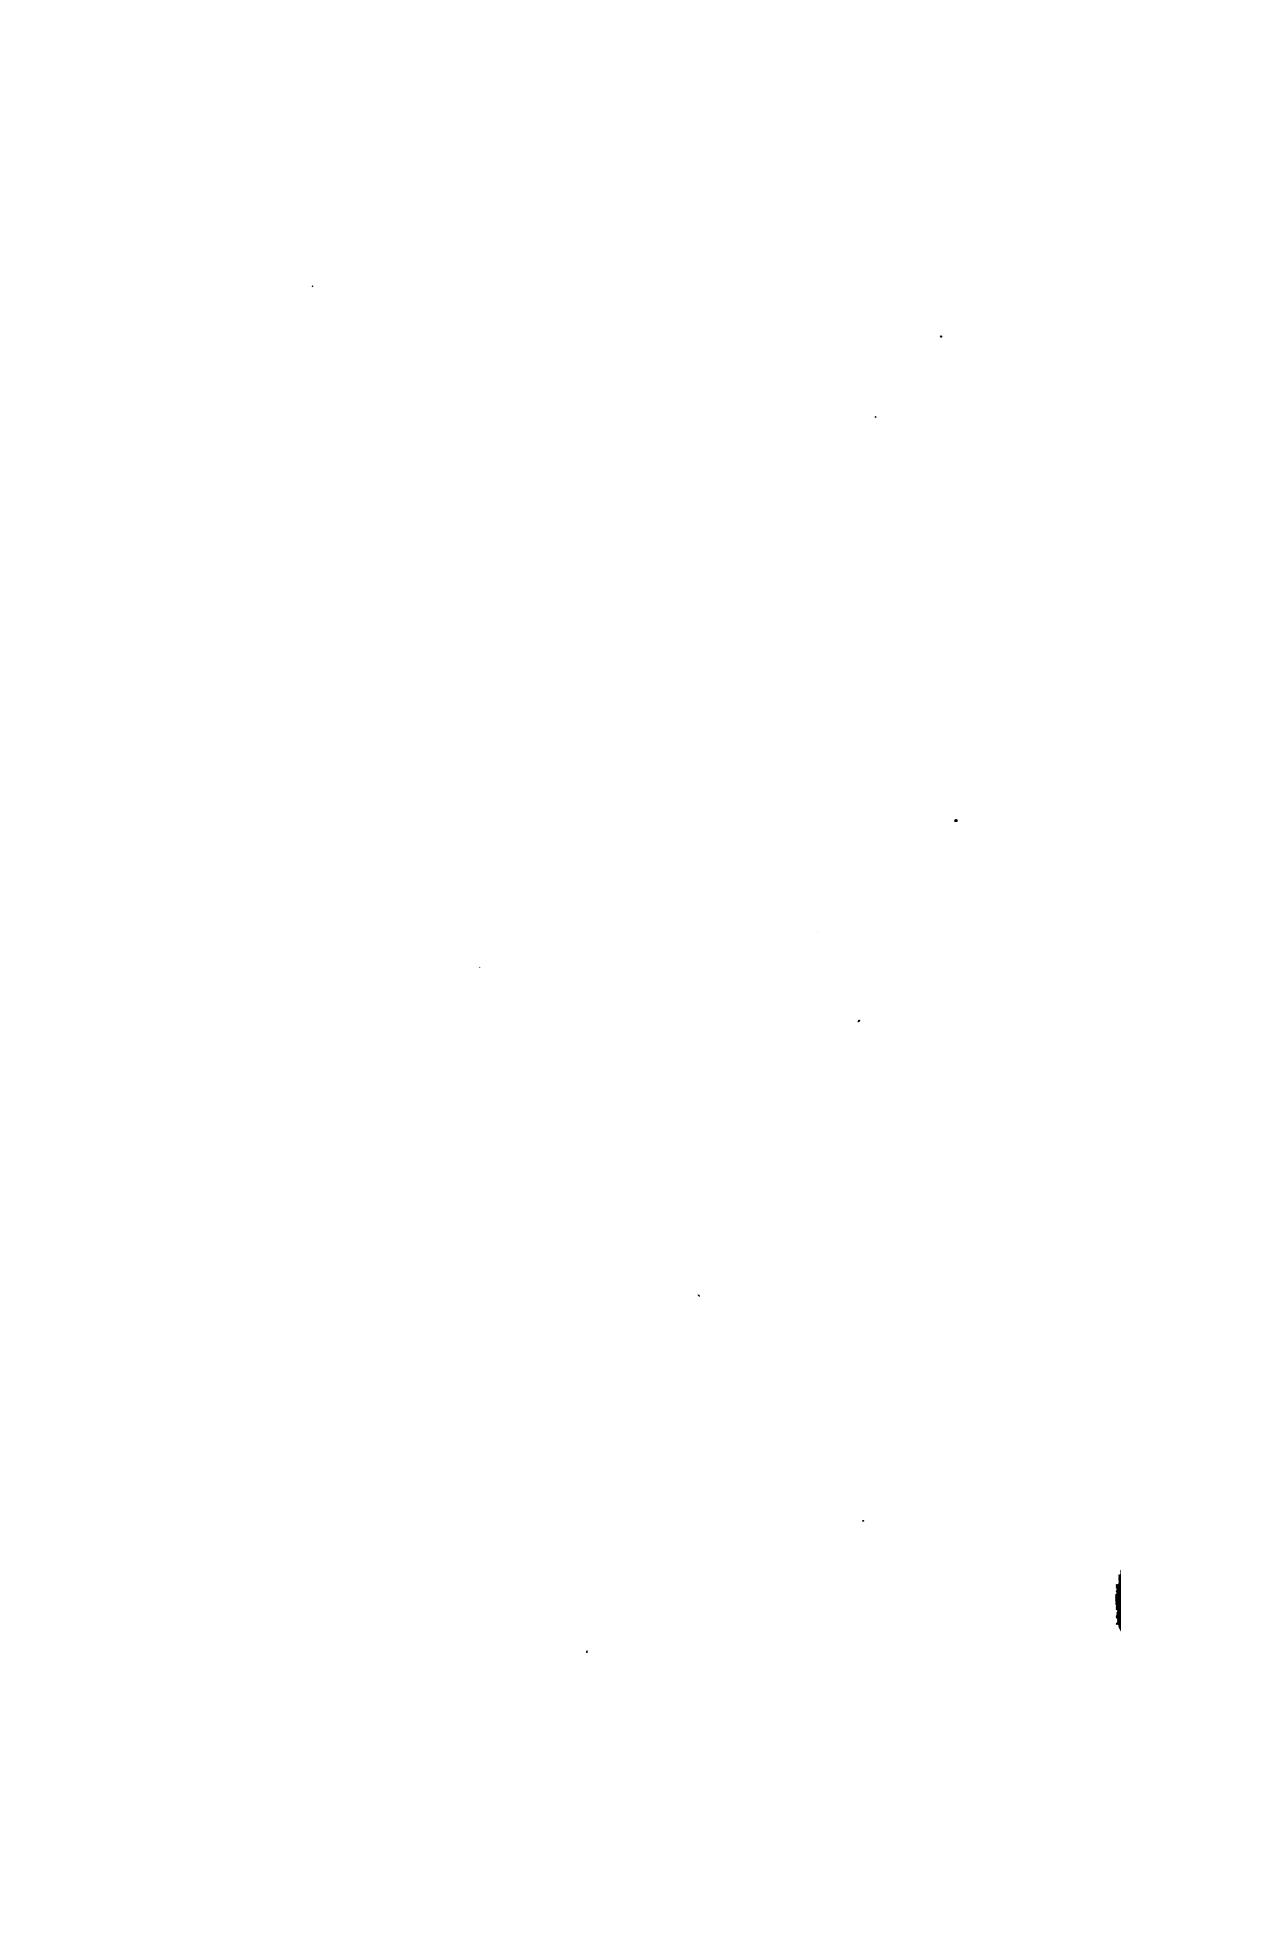

The road-bed on this line was originally constructed for a narrow gauge track, and since the change of gauge much has been done in the way of widening, and raising the grade at several points. Considerable ditching and ballasting has been done during the past few years, and the road-bed, though narrow yet in places, is in very good condition. The track is laid with steel rails, and though lightly constructed, is properly looked after, and kept in good line and surface.

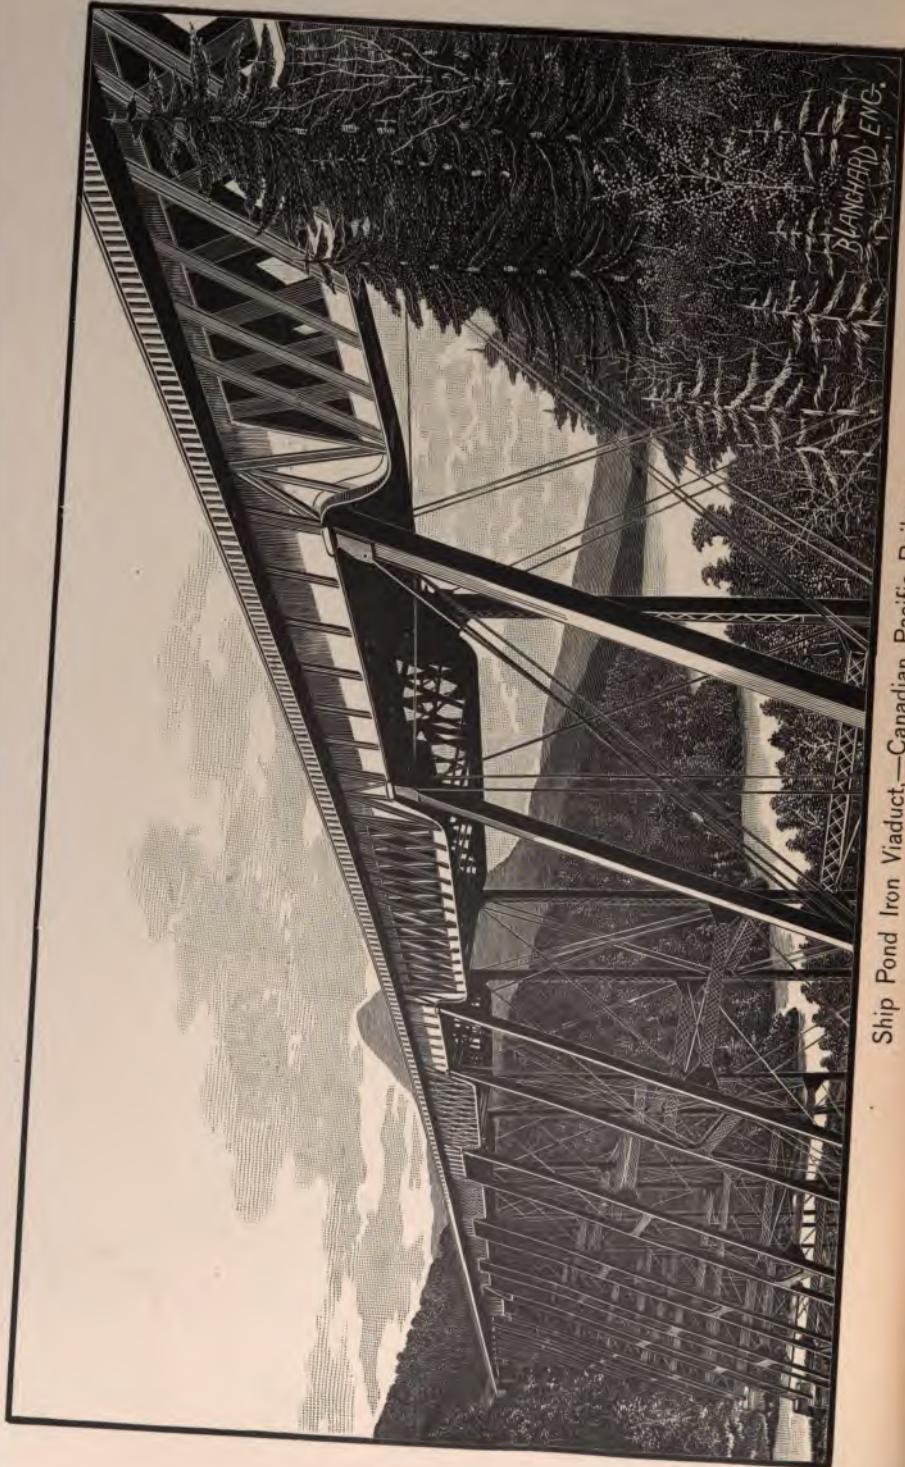

BRIDGES, VIADUCTS AND CULVERTS.

The bridges and culverts on this line are all constructed of wood. The abutments, are crib structures, mostly, and are made of concrete.

Penobscot River Bridge.—Canadian Pacific Railway.

Ship Pond Iron Viaduct,—Canadian Pacific Railway.

BLANCHARD ENG.

timber, the openings being spanned with wooden stringers or by Queen or King trusses. At the time of our last inspection all appeared to be of sufficient strength.

HOUTON BRANCH.

Road Bed, Track, etc.

This branch road of the Canadian Pacific Railway system is well located and constructed, and is now well drained, ditched and ballasted. The track is laid with heavy steel rails, and upon good sound ties, and is good line and surface.

BRIDGES, VIADUCTS AND CULVERTS.

There are no bridges on this line, and but one culvert or open water way, which is in good condition.

Rolling Stock, Station Buildings, etc.

The station buildings on the main line of the Canadian Pacific Railway, in this state, are uniform in style and design, and tasty in appearance. The rolling stock is generally first class.

The rolling stock in use on the Houlton and Aroostook River Branches is in good condition, though some of the passenger cars in use on each, are not of the most modern design or finish.

The station buildings on each of these branch lines are mostly new, tasty and convenient, and are kept clean and neat.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

AUGUSTA, November 17, 1891.

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Franklin & Megantic (Narrow Gauge) Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The road-bed is wide, and has been improved by ditching, draining and ballasting. The track is laid with steel rails, and, on a portion of the road, is in fairly good line and surface. The remainder should be aligned, and the courses properly adjusted. Many of the ties are poor and new ones should be laid.

Bridges, Viaducts and Culverts.

All of the bridges on this line are of wood. Many of the trestle bridges were originally of poor material and badly constructed. For these reasons, they have required constant care and oversight. Several of these have been filled with earth during the past season.

Rolling Stock, Station Buildings, etc.

The rolling stock is in fair condition, and adapted to the business of the road. The station buildings at Kingfield are convenient and comfortable, and at Salem and Freeman fairly good.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

Office of Railroad Commissioners.

AUGUSTA, November 17, 1891.

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Fryeburg Horse Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

This road extends from the railroad station in Fryeburg to "Martha's Grove" and is operated only in the summer season. The track in general is in fair condition although the rails are of very light weight.

Bridges, Viaducts and Culverts.

There are no bridges on this road.

Rolling Stock, Station Buildings, etc.

The rolling stock is in fair condition and is sufficient for the business of the road. There are no station buildings.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

D. N. MORTLAND, } Railroad
A. W. WILDES, } Commissioners

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners.

AUGUSTA, November 17, 189

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Grand Trunk Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The road-bed is of good width, and thoroughly ditched and drained. The track is laid with heavy steel rails upon sound ties, and is aligned, surfaced and ballasted. The location between the fence and cleared of trees and brush, affording an unobstructed view of the way.

The road-bed and tracks of the Lewiston and Auburn, Norway Branches, compare favorably with the main line.

Bridges, Viaducts and Culverts.

With the exception of the long pile bridge at Portland, all of important bridges are iron superstructures resting for the most part on abutments and piers of first-class masonry, and most of the ways and culverts are spanned by iron girders, or beams, and a few by large wooden stringers.

The bridges on the Lewiston and Auburn Branch are iron structures, supported by first-class masonry. There is but one single pile bridge on the Norway Branch, which is in good order.

Rolling Stock, Station Buildings, etc.

The rolling stock in use on the main line and branches, is generally first-class. Some of the station buildings are new, comfortable and convenient, others are old and not adapted to the wants or convenience of the public.

In Witness Whereof, we have set our hand, this seventeenth of November A. D. 1891.

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Kennebec Central (Narrow Gauge) Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The road-bed is of good width, and is now well ditched and drained. The track is laid with steel rails upon good ties, and is well aligned, surfaced, and fairly ballasted.

Bridges, Viaducts and Culverts.

There are two wooden trestle bridges, and several open water ways and culverts. The trestles are well built, and the open water ways are spanned by wooden stringers, resting upon substantial masonry.

Rolling Stock, Station Buildings, etc.

The rolling stock is first-class. The station buildings at Randolph, and at Togus, are well built and tasty structures, and are comfortable and convenient in all respects.

In Witness Whereof, we have set our hands this seventeenth day of November, A. D. 1891.

Office of Railroad Commissioners.

AUGUSTA, November 17, 189

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of Knox & Lincoln Railway, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

This line of railroad was originally poorly located and constructed. Much, however, has been done since it was first constructed to remedy a faulty location. Since the Shore Line Railroad Company assumed the road, a large amount of money has been expended in much labor performed, in improving the road-bed, and line widening, ditching and draining. Many new ties have been placed within the past year, and the track, for the first time, has been put in good line and surface.

Bridges, Viaducts and Culverts.

Many of the bridge superstructures have been repaired and strengthened during the past year, while at other points new structures have taken the place of old. The truss bridge at Mons. is being renewed and a more substantial structure will soon take place. Many culverts and water ways have been re-built during past season. Much, however, will yet have to be done upon bridge structures of this line to insure entire safety, provided the rolling stock shall be used.

Rolling Stock, Station Buildings, etc.

The station buildings throughout the entire line have been repaired or enlarged.

Platforms have been enlarged and extended, and wooden awnings erected over the same. Nearly all of the passenger stations are of modern design and are comfortable and convenient.

The rolling stock in use is in good condition.

In Witness Whereof, we have set our hands this seventeenth day
of November, A. D. 1891.

D. N. MORTLAND, } Railroad
A. W. WILDES, } Commissioners

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners.

AUGUSTA, November 17, 1891.

We, the undersigned, board of Railroad Commissioners, here certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock the Lewiston & Auburn Horse Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

This road extends along the principal streets of Lewiston and Auburn, and along the highway to Lake Auburn. The grade of that part of the road which lies within the thickly settled parts of the cities of Lewiston and Auburn, conforms to that of the street, and the track is in fair line and surface. That part of the road which leads to Lake Auburn is for a portion of the distances, off side of the traveled highway and is not in good line or surface.

Bridges, Viaducts and Culverts.

The bridges over which the road passes are maintained by several municipalities.

Rolling Stock, Station Buildings, etc.

The rolling stock is sufficient for the business of the road and maintained in a good condition.

The company have a neat and convenient waiting station at Lewiston.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners.

AUGUSTA, November 17, 1891.

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Lime Rock Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

This line of railroad, though constructed mainly for the transportation of lime-stone from the quarries to the kilns, in the city of Rockland, is well located and constructed.

The road-bed is wide, and the grades are well distributed. Sufficient ditching and draining has been done to clear the road-bed of surface drainage. The track is of standard gauge, generally laid with steel rails. A part, however, was laid with old iron rails which are now much worn and laminated. The track generally is maintained in good line and surface.

Bridges, Viaducts and Culverts.

The bridge structures on this line consist mainly of southern pine trestles. These constitute a large portion of the main line, and approaches to the lime kilns.

These trestles have been substantially constructed, and are all in good condition.

Rolling Stock, Station Buildings, etc.

The rolling stock consists only of locomotives and cars used for the transportation of lime-stone.

These are in good condition. As this is not a passenger railroad, station buildings are not required.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

D. N. MORTLAND,
A. W. WILDES,
ROSCOE L. BOWERS. } Railroad

of Maine.

STATE OF MAINE.

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners.

AUGUSTA, November 17, 189

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Maine Central Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

PORTLAND TO BANGOR.

Road Bed, Track, etc.

The portion of the Maine Central Railroad extending from Portland to Bangor is not excelled by any other line of railroad in the State.

Much has been done within the past few years upon the road-bed by way of widening, ditching and draining.

Many depressions in the track have been raised and grates lessened, and all from Portland to Waterville has been laid heavy steel rails, and has throughout been well ballasted, and maintained in good line and surface. That part of the road between Portland and Brunswick is entitled to special mention and commendation.

BRIDGES, VIADUCTS AND CULVERTS.

The bridges, viaducts and culverts throughout this portion of road are generally first-class. The bridge superstructures are nearly all of iron, and are mostly of a modern and approved design, among which we are pleased to mention the one over the Gardiner sluice which has been erected during the past year.

BANGOR TO VANCEBORO.

Road Bed, Track, etc.

This road was originally well located, though much of it passes through low lands and swamps, which at certain seasons of the year has been overflowed and the track and road bed to some extent washed away, and otherwise damaged, thus compelling the rail-

Maine Central Railroad Bridge Across the Kennebec River at Augusta, Maine.

B.

company to expend large sums of money in raising the road bed, ballasting the track and in rip-rapping. Considerable ditching has been done during the past year, and many new ties have been laid. Fifteen miles of new steel rails have been laid during the past season. The track is maintained in fair line and surface.

BRIDGES, VIADUCTS AND CULVERTS.

Some of the wooden structures are becoming old, but preparations are being made to replace all such with new and modern iron superstructures. New iron bridge superstructures have been erected over the Mattawamkeag river, and over Kenduskeag stream at Bangor, and the Molunkus stream, and at Bancroft, during the past season.

CUMBERLAND JUNCTION TO WATERVILLE.

Road Bed, Track, etc.

This portion of the road is well ditched, drained and ballasted. The greater part of the track is now laid with heavy steel rails and is well lined and surfaced.

BRIDGES, VIADUCTS AND CULVERTS.

Many of the open water ways and culverts have been rebuilt during the past year. All of the bridge superstructures on this line of road are of iron, and are generally placed upon first-class masonry.

BANGOR AND MT. DESERT FERRY.

Road Bed, Track, etc.

This branch of the Maine Central Railroad has been very much improved since it was first constructed. The road-bed has been raised in many places, and ditched and drained where needed.

The track is well ballasted and maintained in good line and surface.

BRIDGES, VIADUCTS AND CULVERTS.

All of the bridge superstructures, except that across the Penobscot river, are now of iron, and are generally of first quality, and the water ways and culverts are well constructed.

BREWER TO BUCKSPORT.

Road Bed, Track, etc.

But little has been expended on the road bed or track of this portion of the Maine Central Railroad since it has been owned and

operated by that corporation. Sufficient repairs and renewals been made to keep it in a safe condition.

BRIDGES, VIADUCTS AND CULVERTS.

There are but few openings on the line of this road, and have good stone abutments, and are spanned with wooden strin

BATH TO LEWISTON.

Road Bed, Track, etc.

This portion of the Maine Central system, a part of which originally poorly located, has been by large expenditures put in class condition. The road-bed has been widened and raised needed, and is now well ditched and drained, and the track is ballasted.

BRIDGES, VIADUCTS AND CULVERTS.

A new and substantial iron superstructure on first class abutments has taken the place of the old wooden truss bridge at Sewall's Creek. Preparation is being made to place a similar structure at New Meadows, on the line between Bath and Brunswick. A new iron plate girder has been put in at Sabattus stream. other bridge structures on this line are in a good and safe condi

CROWLEY'S JUNCTION TO FARMINGTON.

Road Bed, Track, etc.

This line of railroad was originally poorly located and faulty construction, but since it has been owned and operated by the Maine Central Railroad Company, it has been greatly improved. The road-bed is fairly well ditched and drained, and the track has been raised in places where needed.

From Crowleys' Junction to Leeds Junction the road-bed and track has been for the past few years somewhat neglected.

During the past season, it has been some improved by way of digging and ballasting and in lining and surfacing the track, and it rides fairly well, though the steel and iron rails in use are somewhat worn. The rest of the track is in good condition.

BRIDGES, VIADUCTS AND CULVERTS.

The bridge structures on this line are mostly of wood, but a good material, well constructed, and in good condition.

The truss and pile bridge at Farmington has been in part renewed and repaired during the past season. The small bridges and culverts have received all needed repairs.

WATERVILLE TO SKOWHEGAN.

Road Bed, Track, etc.

Considerable has been done to improve the road-bed and track of this line during the past season, by way of ditching, draining and ballasting. The track is in good line and surface, and rides well.

BRIDGES, VIADUCTS AND CULVERTS.

The bridge superstructures on this line are of iron, and are placed on good stone abutments. Many of the culverts and water ways have been rebuilt during the past year, and are now all in good condition.

BURNHAM JUNCTION TO BELFAST.

Road Bed, Track, etc.

Little has been done on the line of this road, other than what has been done by the section men. The road-bed is fairly well ditched and drained, but needs ballast in many places.

The track has been kept in fair line and surface notwithstanding the fact that most of the iron rails in use are those that were first laid.

BRIDGES, VIADUCTS AND CULVERTS.

Many of the bridges on this line have been rebuilt within the past few years, and though of wood are substantially built and of good material. The culverts and water ways have received needed repairs and renewals.

NEWPORT TO FOXCROFT.

Road Bed, Track, etc.

The portion of this road, known as the Dexter & Newport branch, was originally well constructed, and though in the past it has been somewhat neglected; since the line has been extended to Foxcroft, it has been much improved, by way of ditching and ballasting. The construction of the road from Dexter to Foxcroft was faulty in many respects. The line was originally constructed by the Dexter & Piscataquis Railroad Corporation.

Since it has been leased by the Maine Central Railroad Company, the road has been substantially reconstructed, and is now in good condition.

BRIDGES, VIADUCTS AND CULVERTS.

The greater portion of the bridge superstructures are of iron and are supported by good stone abutments. Many of the culverts and water ways will have to be rebuilt.

MOUNTAIN DIVISION.

Road Bed, Track, etc.

This line of railroad which was formerly known as the Portland & Ogdensburg Railroad, was originally well located and constituted much has been done in recent years, by filling and reducing grades at certain points within this State. The road-bed and track generally, have been much improved since the road has been operated by the Maine Central Railroad Company. The track is in good line and surface, and the road is in a satisfactory condition.

BRIDGES, VIADUCTS AND CULVERTS.

The greater portion of the bridge superstructures are of iron and substantial and of an approved design. Such as are of wood have been rebuilt or strengthened when needed.

The culverts and water ways have been carefully looked after at many points iron stringers have been substituted for the wood.

Rolling Stock, Station Buildings, etc.

Much has been done by the company during the past few years in rebuilding and reconstructing station buildings, platforms,ings, etc., throughout the entire system. Nearly all of the passenger station buildings are new and convenient, and are generally clean and neat by those in charge.

The rolling stock used on the main lines, as a rule, is first class in every respect, and that on all lines, as good as travel and demands.

In Witness Whereof, we have set our hands this seventeenth of November A. D. 1891.

Office of Railroad Commissioners.

AUGUSTA, November 17, 1891.

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Phillips & Rangeley (narrow gauge) Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The road-bed is wide, well graded, and fairly well ditched and drained. The track is laid with steel rails of thirty-five pounds to the yard, and a large proportion of it is in good line and surface, and fairly well ballasted.

Bridges, Viaducts and Culverts.

There are three "Through Howe Truss" wooden bridges on this line; the longest and most important of these is the one across the Sandy river at Phillips. This bridge is built in a substantial manner, of good timber and rests upon abutments and piers of well built masonry. The other two, one across the Perham stream, and the other across the Oberton stream, are well constructed and are supported by stone abutments.

There are several long trestle bridges, all of which are built in a substantial manner. The smaller water ways and culverts are spanned by wooden stringers, all of which are well built and all in good condition.

Rolling Stock, Station Buildings, etc.

The rolling stock is mostly new and in good order. The station buildings are not all completed. A new station building has been built at Redington, and another is being built at Rangeley.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners.

AUGUSTA, November 17, 1891.

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Portland & Rochester Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The road bed is wide, and for the most part well ditched and drained. The track is laid with steel rails, upon cedar ties and is fairly well lined, surfaced and ballasted.

The new extension from the Portland and Rochester station in Portland, to the Union station, is well constructed and in good condition in every respect. The track on the Marginal Way is not in good line or surface. The road-bed is narrow, and should be widened and protected with rip-rap.

Bridges, Viaducts and Culverts.

The bridge on the main line at Saco river, is an iron truss resting upon good granite abutments and piers. The bridge at Shaker pond in Alfred is a plate girder supported by first-class masonry. The wooden truss bridges at Springvale and East Rochester, and other small or truss bridges along the line are in good condition, several of them having been rebuilt during the past three years. Iron I beams and girders have been substituted for wooden stringers on most of the open water ways and culverts. The sluice ways on the Marginal Way in Portland should be rebuilt.

Rolling Stock, Station Buildings, etc.

The rolling stock is generally first-class and is in good condition. Additions have been made to it during the past season.

The station buildings are well arranged, and are comfortable and convenient structures, and kept in good order.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

D. N. MORTLAND, } Railroad

STATE OF MAINE.

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners.

AUGUSTA, November 17, 1891

We, the undersigned, board of Railroad Commissioners, do certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Rockport (three feet gauge) Railroad, as required by law, find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The Rockport railroad was constructed wholly for the purpose of transporting lime-stone from the quarries at Simonton's Corner, called, to Rockport village. It is a narrow gauge road, well located and was fairly well constructed.

Considerable has been done during the past two years, in widening and raising the road-bed in low places. The track is laid on light steel rails, which though considerably worn are still in condition.

Bridges, Viaducts and Culverts.

There are but few bridges on this line, and these consist of wooden stringers upon piles or trestles. All have been kept in good repair and are in safe condition.

Rolling Stock, Station Buildings, etc.

This road having been constructed for the purpose of transporting lime-stone, and used for no other purpose, no station buildings required. The rolling stock is light, but in fairly good repair and condition.

In Witness Whereof, we have set our hands this seventeenth of November A. D. 1891.

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners.

AUGUSTA, November 17, 1891.

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Portland & Rumford Falls Railway (R. F. & B. R. R.) as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The road-bed is of good width, and is generally well ditched and drained. The track is mostly laid with steel rails upon fairly good ties, and it is well lined, surfaced and ballasted.

Bridges, Viaducts and Culverts.

The high pile bridge at Pottle stream has been rebuilt in a substantial manner, with oak piles, and hard pine timber. The superstructure of the wooden truss bridge at Buckfield is in good order, and is supported by abutments of second class masonry. The wooden lattice bridge at Sumner, rests upon abutments of first-class masonry and, and is in good condition.

The smaller open water ways and culverts have been repaired and strengthened.

Rolling Stock, Station Buildings, etc.

The rolling stock is mostly first-class and in good condition. The station buildings are in good repair, comfortable and convenient.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners.

AUGUSTA, November 17, 1891

We, the undersigned, board of Railroad Commissioners, do certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Sandy River (narrow gauge) Railroad, as required by law, find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

During the past season, some attention has been given to repairing and widening the road-bed, also to ditching and draining, but more is required as many of the embankments are still too narrow.

About twelve miles of steel rails have been laid this season, completing the steel track between Farmington and Phillips.

Considerable ballasting has been done, and the line and surface of the track has been much improved.

Bridges, Viaducts and Culverts.

There are many high trestle bridges on the line of this road, which require constant care and attention.

Several of these have been repaired this season, and others are in process of repair. The bridge over the Sandy river at Phillips, iron truss, of modern design and construction, resting upon abutments of solid masonry. The long high trestle at Strong has been somewhat repaired and strengthened, and repairs have been made on several of the smaller water ways.

Rolling Stock, Station Buildings, etc.

The rolling stock is generally first-class, and in good condition. The station buildings are fairly convenient.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

D. N. MORTLAND, } Railroad
A. W. WILDES, } Commission

AUGUSTA, November 17, 1891.

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Seabasticook & Moosehead Railroad as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The road-bed is narrow, and should be widened and raised, and properly ditched. The track is laid with steel rails, but is not in good line or surface. Many new ties are needed.

Bridges, Viaducts and Culverts.

There is but one wooden trestle bridge on the line of this road, and that is in fair condition.

Several of the culverts should be rebuilt and others repaired.

Rolling Stock, Station Buildings, etc.

The rolling stock is old and nearly worn out. The station buildings at Hartland are fairly convenient.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

D. N. MORTLAND, } Railroad
A. W. WILDES, } Commissioners
ROSCOE L. BOWERS. } of Maine.

RAILROAD COMMISSIONERS' CERTIFICATE.

Office of Railroad Commissioners.

AUGUSTA, November 17, 1891

We, the undersigned, board of Railroad Commissioners, do certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the Somerset Railway, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The road-bed is of good width, and for the most part protected and drained. A little more than one-half of the track is laid with steel rails and the remainder is laid with iron. The track is in good line and surface, and rides well. The ties are generally sound and good.

Bridges, Viaducts and Culverts.

The long wooden lattice "Deck" bridge across the Kennebec river at Norridgewock, and the long "Through" lattice bridge across the same river at Madison, and the "Through" lattice bridge across the Carratunk stream at North Anson are in good condition, and are supported by abutments and piers of first-class masonry.

The new iron bridge over the Kennebec river at Solon is a substantial structure of modern design, and rests upon abutments and piers of first-class masonry. There are several trestle and bridges at different points on the road, all of which are well constructed. The open water ways, are mostly spanned with wooden stringers, resting upon stone abutments.

Rolling Stock, Station Buildings, etc.

The rolling stock is not modern in style but is in good condition for the service. The station buildings at Norridgewock, Madison and North Anson are comfortable. Those at Solon and Bingham are of later style and construction, and more conveniently arranged.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

AUGUSTA, November 17, 1891.

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the St. Croix & Penobscot Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The road-bed is of fair width, but the surface is irregular and uneven, and it should be raised, surfaced and ballasted. A little more than seven and one-half miles of the track are laid with steel rails, the remainder is laid with iron which is much worn. Many new ties are needed.

Bridges, Viaducts and Culverts.

The long truss deck bridge across the St. Croix river at Baring, and the "Through" lattice bridge crossing the same river at Sprague's Falls are maintained in a safe condition. The trestle bridges and open water ways of which there are many along the road, are kept in fair repair and in a safe condition.

Rolling Stock, Station Buildings, etc.

The rolling stock is adapted to the service required of it, and the station buildings are fairly good.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

D. N. MORTLAND, } Railroad
A. W. WILDES, } Commissioners

AUGUSTA, November 17, 1891

We, the undersigned, board of Railroad Commissioners, do certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock the Waterville & Fairfield (Horse) Railroad, as required by and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

This railroad is constructed on the principal thoroughfare of city of Waterville, and the highway leading to and into the village of Fairfield. It is well constructed, and has been carefully maintained and successfully operated.

Bridges, Viaducts and Culverts.

There are no bridges or culverts on the line, constructed or maintained by the railroad corporation.

Rolling Stock, Station Buildings, etc.

The rolling stock is ample for the accommodation of the traffic on said road, and is maintained in good condition.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

AUGUSTA, November 17, 1891.

We, the undersigned, board of Railroad Commissioners, hereby certify, that during the past year, we have made careful examinations of the track, bridges, viaducts, culverts and rolling stock of the York Harbor and Beach Railroad, as required by law, and find the condition of said road and rolling stock to be as follows:

Road Bed, Track, etc.

The road-bed has been much improved during the past two years and is now of fair width, well ditched, drained and ballasted. The rails are of steel and the track is in good line and surface.

Bridges, Viaducts and Culverts.

The location of the road being in many places across tide water, a large amount of pile bridging was required. In the construction of these, heavy oak piles were used. These bridges are well built, and are in the main in good condition, although one or two are now somewhat out of line. The small openings and water ways are in good order.

Rolling Stock, Station Buildings, etc.

The rolling stock is furnished by the Boston & Maine Railroad Company and is of the same class in use by that corporation.

The station buildings are new, tasty and convenient.

In Witness Whereof, we have set our hands this seventeenth day of November A. D. 1891.

Report of the Boston and Maine Railroad Company for the Year Ending June 30, 1891.

HISTORY.

Name of common carrier making this report? Boston and Maine R. R. Company.
Date of organization? June, 1835.

Under laws of what States organized? Commonwealth of Massachusetts, State of New Hampshire, State of Maine

If a consolidated Company, name the constituent companies Give reference charters of each, and all amendments of same. Boston and Portland Railroad Massachusetts, Boston, and Maine Railroad of New Hampshire, Maine, New Hampshire and Massachusetts Road of Maine.

STATE OF MASSACHUSETTS.

1833. Chap. 109. An Act to incorporate the Andover and Wilmington Railroad from Andover to Wilmington, with a capital stock of one thousand shares, the route to be located before June 1st, 1834. (See *B & L. R. R. vs. B. & M. R. R.*, 5 Cush. 37)

1834. Chap. 175. Time of location extended.

1835. Chap. 134. Capital stock increased. Time for construction extended January 1st, 1836, and permission given to alter the route.

1837. Chap. 113. An Act authorizing the building of a branch from Bradford the State Line of New Hampshire, increasing the capital stock not exceeding thousand shares, and to change the name to Andover and Haverhill Railroad Corporation.

1839. Chapter 62. An Act to increase the capital stock by \$150,000, and to change the name to the Boston and Portland Railroad Corporation.

1841. Chap. 56. An Act to constitute the stockholders of the Boston and Portland Railroad Corporation stockholders of the Boston and Maine Railroad Company of New Hampshire, and authorizing the union of said companies under the name of the Boston and Maine Railroad Company.

1843. Chap. 90. The Boston and Maine Railroads of New Hampshire and Massachusetts having been united, the united corporation is authorized to unite with the Maine, New Hampshire and Massachusetts Railroad Corporation of Maine, under the name of the Boston and Maine Railroad.

1844. Chap. 172. An Act to incorporate the Boston & Maine Railroad Extension Company from the Boston & Maine Railroad in Wilmington, through Reading, Stow, Malden, Somerville or Charlestown, to Haymarket Square, Boston, and authorize the Boston and Maine Railroad to subscribe for stock of the Extension Company, and to increase its own stock therefor. (See *Commonwealth v. B. & M. R. R.*, 3 Cush. 26, and *Davidson v. B & M. R. R.*, 3 Cush. 91.)

1845. Chap. 159. An Act to unite the Boston and Maine Railroad and the Boston & Maine Railroad Extension Company under the name of the Boston & Maine Railroad.

1846. Chap. 75. An Act authorizing the re-location of the Boston & Maine Railroad in Andover and the discontinuance of a portion of the original road, and increase its capital stock. Also to build the Methuen Branch. (See *Hagen v. B. & M. R. R.*, 29 Gray, 574.)

1848. Chap. 292. An Act affecting the location in Somerville and Boston.
1848. Chap. 322. An Act to alter the location of the Methuen Branch so as to meet the Manchester & Lawrence Railroad at the New Hampshire line
1849. Chap. 226. An Act to increase the capital stock by an amount not exceeding \$600,000
1841. Chap. 139. An Act authorizing the purchase of the Stoneham Branch Railroad, and an increase of capital stock therefor.
- 1855 Chap 42. An Act authorizing the purchase of the franchises and property of the Danvers Railroad.
1855. Chap. 141. An Act to authorize the Boston & Maine Railroad to amend and refile its location.
1855. Chap. 371. An Act to permit the widening of the bridge across Charles River, within certain limits.
1855. Chap. 386. An Act to establish an independent line of railroad communication between Boston and Lowell. (See Boston & Lowell R. R. v. Salem & Lowell R. R., 2 Gray 1.)
1861. Chap. 176. An Act to authorize the purchase of certain flats and the widening of the Charles River Bridge.
1866. Chap. 102. An Act in regard to the lease of the South Reading Branch.
1867. Chap. 170. An Act to authorize the subscription for stock in the Marginal Freight Railroad Company.
1868. Chap. 17. An Act to relocate the North Andover Branch, and to increase its capital stock to \$5,000,000.
1868. Chap. 118. An Act concerning the crossing of the Eastern Railroad and the Boston and Maine Railroad at Lawrence.
1869. Chap. 343. An Act concerning the bridges over Charles River.
1869. Chap. 352. An Act concerning the same.
1869. Chap. 398. An Act concerning the purchase of the Newburyport City Railroad.
1870. Chap. 9. An Act to authorize the Boston & Lowell Railroad to cross the Boston & Maine Railroad at grade in Somerville.
1870. Chap. 301. An Act concerning the terminal facilities in Boston and the draws across Charles and Miller Rivers.
- 1870 Chap 401. An Act amending the preceding act
1872. Chap 356. An Act authorizing the Eastern Railroad to take certain land on Causeway Street, in Boston, occupied by the Boston & Maine Railroad.
- 1875 Chap. 357. An Act to provide for the discontinuance of the grade crossings of railroads in Somerville, Charlestown and Boston.
1876. Chap. 7. An act to authorize the purchase of the West Amesbury Branch Railroad.
1876. Chap. 124. An Act to authorize the purchase of the Newburyport Railroad.
1876. Chap. 126. An Act to authorize the purchase of the Danvers Railroad.
1878. Chap. 245. An act in relation to the crossing of the track of the Boston and Maine Railroad by the Lowell and Lawrence Railroad at South Lawrence.
1880. Chap. 205. An Act to authorize the Boston and Maine Railroad and Eastern Railroad to make a contract or lease. (See Phillips vs. Eastern R. R., 138 Mass. 122.)
1886. Chap. 292. An act to provide for a Railroad Union Passenger Station in Boston.

1887. Chap. 302. An Act in amendment of the preceding act.

1887. Chap. 400. An Act to further provide for a Union Railroad Passenger Station in Boston.

1888. Chap. 250. An Act to authorize the Boston and Maine Railroad to purchase the franchises and property of the Eastern Railroad of New Hampshire, and Portsmouth, Great Falls and Conway Railroad, and to increase its capital stock therefor.

For further Acts concerning the Boston and Maine Railroad, see Acts of 18: chapter 188; 1829, chapter 145; 1844, chapter 83; 1844, chapter 116; 1846, chapters 79, 157, 212, 229; 1847, chapters 70, 200, 238, 278; 1848, chapters 41, 204, 223, 231, 263, 264; 1849, chapters 7, 230; 1850, chapters 113, 240; 1851, chapter 196, 236, 244; 1852, chapters 32, 118, 167, 305, 306; 1853, chapters 64, 121, 2415; 1854, chapters 31, 310, 336, 353; Resolve, chapter 82; 1855, chapter 375; 18 chapters 184, 263; Resolve, chapter 88; 1859, chapter 115; 1860, chapter 63; 18 chapter 15; 1864, chapters, 54, 283; 1866, chapters 127, 265, 278; 1868, chapter 178, 188, 253; 1869, chapters 378, 401; 1870, chapter 320; 1871, chapters 184, 31 1878, chapter 79; Resolve, chapter 30; 1881, chapter 265; 1885, chapter 259; 18 chapter 96.

STATE OF NEW HAMPSHIRE.

1835. Chap. 14. An Act to incorporate the Boston and Maine Railroad, with location from Haverhill, Mass., to boundary line between New Hampshire and Maine. Capital stock \$600,000

1838. Chapter 32. An Act in addition to the preceding act, authorizing a charter in the location between Andover and Haverhill Railroad and the State of Maine.

1841. Chapter 6. An Act authorizing the union of the Boston and Portland Railroad, the Maine, New Hampshire and Massachusetts Railroad, Dover and Winnipesaukee Railroad, and the Boston and Maine Railroad, under the name of the Boston and Maine Railroad, and making the stockholders of each railroad stockholders of Boston and Maine Railroad, and increasing the power and privileges of said unit railroads.

1841. Chapter 290. The Boston and Maine Railroad of Maine, New Hampshire and Massachusetts, having united, this act authorized the Boston and Maine Railroad to unite with the Boston and Maine Railroad Extension Company.

1887. Chap. 304. An Act to authorize the Boston and Maine Railroad to purchase the franchises and property of the Eastern Railroad Company, and the East Railroad of New Hampshire, and to purchase the stocks, etc., of said railroads, to increase its capital stock therefor, under certain limitations, and to make certain exchanges of stock, etc.

STATE OF MAINE.

1836. Chap. 179. An Act to establish the Maine, New Hampshire and Massachusetts Railroad Corporation, extending from Portland, Maine, to the State Line of New Hampshire, there to connect with the railroad running through New Hampshire, road to be completed on or before December 31st, 1846.

1839. Chap. 533. An Act additional to the above, extending the time for building the road to December 31, 1850.

1841. Chap. 145. A further Act in addition to the above makes a change in location, and gives authority to connect with other roads.

1843. Chap. 108. An Act to unite the Maine, New Hampshire and Massachusetts Railroad Corporation with the Boston & Maine Railroad, constitutes the stockholders of the former road stockholders of the latter, a corporation already existing under the laws of New Hampshire and Massachusetts, and the two corporations are by this act made one corporation by the name of the Boston & Maine Railroad.

1844. Chap. 152. An Act in addition to the last named act, and explanatory thereof

1846. Chap. 350. An Act authorizing the union of the Boston & Maine Railroad Extension Company, a Massachusetts corporation, with the Boston & Maine Railroad.

1869. Chap. 40. An Act establishing the amount of capital stock of the Boston & Maine Railroad at \$5,000,000, and giving consent to the acts of the Massachusetts Legislature concerning said Boston & Maine Railroad.

1869. Chap. 103. An Act amending the preceding act, rectifying a clerical error therein.

1871. Chap. 630. An Act for the extension of the Boston & Maine Railroad in Maine, and for increase of capital stock by a sum not exceeding \$2,000,000.

1873. Chap. 222. An Act to confirm the location of the railroad through Berwick and North Berwick in Maine, under certain restrictions.

1876. Chap. 248. An Act to incorporate the Orchard Beach Railroad Company, with a capital stock of \$60,000, with power to construct a railroad along Old Orchard Beach.

1876. Chap. 290. An Act to amend Chapter 272 of the Acts of 1873, modifying the restrictions as to depots

1877. Chapter 326. An Act authorizing the directors of the Orchard Beach Railroad to determine in regard to the operation of said road.

1879. Chap. 117. An Act permitting the discontinuance of a certain part of its railroad in the town of South Berwick.

1881. Chap. 64. An Act to enable the Boston and Maine Railroad to purchase the Orchard Beach Railroad.

1885. Chap. 407. An Act to incorporate the Boston Express Company to operate over the Boston & Maine Railroad.

1887. Chap. 268. An Act authorizing the Boston and Maine to purchase the stock, etc., or to unite with the Eastern Railroad and any other railroad in New Hampshire and Massachusetts, leased to or under contract with the Boston and Maine or Eastern Railroad, and the Portland, Saco and Portsmouth, the Portland and Rochester, Portsmouth, Great Falls and Conway, Kennebunk, Kennebunkport and the Orchard Beach Railroads to increase its capital stock for the purposes of this act.

**Report of the Dexter and Newport Railroad Company-1
for the Year Ending June 30, 1891.**

HISTORY.

Name of common carrier making this report? Dexter and Newport Railroad Company.

Date of organization? April 8, 1867.

Organized under the laws of the State of Maine. An act to establish the Dexter and Newport Railroad Company, March 30, 1853, amended by act of March 8, 1864, and an act additional, February 25, 1867.

Leased to the Maine Central Railroad Company by virtue of an act to extend and amend the act of March 30, 1853, approved March 8, 1864, for thirty years, ending November 24, 1898. Also by an additional lease dated December 13, 1888, for 999 years, ratified by act of the legislature February 19, 1889.

Date of authority for consolidation? Consolidated in part by reason of the above mentioned lease of December 13, 1888; this corporation keeping up a separate organization.

This road is operated by the Maine Central Railroad Company.

**Report of the Maine Central Railroad Company for the
Year Ending June 30, 1891.**

HISTORY.

Name of common carrier making this report? Maine Central Railroad Company.

Date of organization, October 28, 1862.

Organized under the laws of the State of Maine. Special acts of April 1, 1856, Mar. 17, 1862, February 25, 1867, February 18, 1869, February 7, 1872, February 26, 1873, February 27, 1873, February 25, 1874, February 18, 1876, February 19, 1878, January 30, 1885, January 28, 1887, March 13, 1889, February 27, 1891.

If a consolidated company, name the constituent companies. Give reference to charters of each, and all amendments of same:

Androscoggin and Kennebec Railroad Company, charter March 28, 1845.

Penobscot and Kennebec Railroad Company, charter April 5, 1845.

Portland and Kennebec Railroad Company, formed by foreclosure on Kennebec and Portland Railroad, and organized May 20, 1862

Somerset and Kennebec Railroad Company, charter August 10, 1848.

Androscoggin Railroad Company, charter August 10, 1848

Leeds and Farmington Railroad Company, formed by foreclosure of part of Androscoggin Railroad and organized May 11, 1865.

Maine Shore Line Railroad Company, charter March 4, 1881.

European and North American Railway Company, charter August 20, 1850.

Eastern Maine Railroad Company, foreclosure of Bucksport and Bangor Railroad and organized February 1, 1882.

Portland and Ogdensburg Railway, foreclosure of Portland and Ogdensburg Railroad Company and organized June 8, 1886.

Dexter and Newport Railroad Company, charter March 30, 1853.

Dexter and Piscataquis Railroad Company, charter October 24, 1868.

Belfast and Moosehead Lake Railroad Company, charter February 28, 1867.

Upper Coos Railroad Company, charter August 23, 1883.

Herford Railway Company, charter June 23, 1887, and May 4, 1888.

Date and authority for each consolidation?

Androscoggin and Kennebec and Penobscot and Kennebec consolidated with Maine Central Railroad Company October 25, 1862

Portland and Kennebec, Somerset and Kennebec, and Leeds and Farmington merged November 16, 1874, act of February 26, 1873.

Androscoggin Railroad, June 29, 1871, lease for 999 years.

Maine Shore Line Railroad, January 28, 1887, purchased by authority of special law of January 28, 1887.

European and North American Railway, April 1, 1882, lease for 999 years.

Eastern Maine Railroad, May 1, 1883, lease for 999 years.

Portland and Ogdensburg Railroad, August 20, 1888, lease for 999 years.

Dexter and Newport Railroad, December 13, 1888, lease for 999 years.

Dexter and Piscataquis Railroad, December 30, 1888, lease for 999 years.

Belfast and Moosehead Lake Railroad, May 10, 1871, lease for 50 years.

Upper Coos Railroad, May 1, 1890, lease for 999 years.

Herford Railway, May 1, 1890, lease for 999 years.

NAME OF ALL COAL, BRIDGE, CANAL, OR OTHER PROPERTIES, THE EARNINGS AND EXPENSES OF WHICH AFFECT THE GENERAL BALANCE SHEET.

Name.	Character of business	Title, (owned, leased, etc.)	State or Territory.
*Bar Harbor Ferry	Steam Ferry	Owned	Maine.

* Owned and operated as part of its line, for the purpose of transporting passengers, freight, mails and express. Separate accounts not kept.

CAPITAL STOCK.

Description.		Number of shares authorised	Par value of shares.	Total par value authorised	Total amount issued and outstanding.	Dividends declared during year.	
						Rate.	Amount.
Common.....	60,000	\$100	\$5,000,000	\$3,693,600	6 %	\$216,816
Issued for consolidation.....	\$5,936					

The Maine Central Railroad Company was formed by the consolidation of the Androscoggin & Kennebec Railroad Company and the Penobscot & Kennebec Railroad Company, under contract of August 20, 1862. By the terms of this contract, capital stock of the Maine Central Railroad Company was to be issued for the capital stock of the Androscoggin & Kennebec and Penobscot & Kennebec Railroad Companies, share for share. Stock of the Maine Central Railroad Company was also to be issued in exchange for the stock bonds of the Androscoggin & Kennebec Railroad Company, and for 60 per cent of the par value of the third mortgage bonds of the Penobscot & Kennebec Railroad Company.

The Portland & Kennebec Railroad was leased to the Maine Central Railroad Company by contract of May 12, 1870; and by the terms of this contract, Maine Central Railroad stock was issued to the Portland & Kennebec Railroad Company amounting to \$1,716,600.

In June, 1870, the Androscoggin Railroad was leased to the Maine Central Railroad Company; and by the terms of this lease, \$200,000 of the capital stock of the Maine Central Railroad Company was issued to the Androscoggin Railroad Company.

The capital stock of the Maine Central Railroad Company, as it stands on the ledger June 30, 1891, based on the above contracts, is made up as follows:

In exchange for capital stock of Androscoggin & Kennebec Railroad Company.....	\$458,000
In exchange for capital stock of Penobscot & Kennebec Railroad Company	407,000
In exchange for bonds of Androscoggin & Kennebec and Penobscot & Kennebec Railroad Companies	82,700
Issued to Portland & Kennebec Railroad Company	1,716,600
Issued to Androscoggin Railroad Company.....	200,000

\$3,693,600
Of this amount of \$3,693,600, standing as capital stock on the ledger, \$9,600 has not actually been issued, for the reason that holders of the Androscoggin & Kennebec and Portland & Kennebec Railroad Companies' stock, entitled thereto, did not present such stock for exchange for Maine Central stock; so that the amount of capital stock on which dividends will be paid hereafter is \$3,694,000. Four hundred dollars more, added to the capital stock by exchange for Androscoggin & Kennebec stock, after dividends shown in this report were declared, but previous to June 30, 1891.

**Report of the Rumford Falls and Buckfield Railroad
Company for the Year Ending June 30, 1891.**

HISTORY.

Name of common carrier making this report? Rumford Falls and Buckfield Railroad Company.

Date of organization, October 8, 1875.

Organized under the laws of the State of Maine, as follows:

Chartered as Buckfield Branch Railroad Company June 22, 1847. Road opened for thirteen miles October 10, 1849.

In 1856 the road was sold under foreclosure, and subsequently acquired by the Portland and Oxford Central Railroad Company, which was chartered April 16, 1867, and under this organization, extended the road to Canton.

The Rumford Falls and Buckfield Railroad Company was chartered March 3, 1874, and became owner of the property, restored the road, furnished new rolling stock, and resumed operations July 15, 1879, and extended the road to Gilbertville in 1879.

**Report of the Somerset Railway Company for the
Year Ending June 30, 1891.**

HISTORY.

Name of common carrier making this report? Somerset Railway Company.

Date of organization? August 15, 1883.

Organized under the laws of the State of Maine; act approved March 19, 1860; Revised Statutes, chapter 51, section 56. Amended March 6, 1863, and 1887.

Mortgage of Somerset Railroad Company foreclosed by final decree of the Supreme Court, April 1, 1887. Right of redemption sold at public auction, July 8, 1884, and deed given Somerset Railway by Charles McFadden, Deputy Sheriff.

If a reorganized company, give name of original corporation, and refer to laws under which it was organized. Somerset Railway Company; March 19, 1860.

Guage of track, 4 feet, 8½ inches. 42.06 miles.

Telegraph owned and operated by this company, 41.06 miles of line, with 42 miles of wire.

**Report of the St. Croix and Penobscot Railroad Company
for the Year Ending June 30, 1891.**

HISTORY.

Name of common carrier making this report? St. Croix and Penobscot Railroad Company.

Date of organization, July 25, 1835.

Organized under the laws of the State of Maine, chapter 238, laws of 1832, chapter 550, of 1835, chapter 373, of 1837, chapter 409, of 1838, chapter 238, of 1849, chapter 587, of 1852, chapter 363 of 1870, and chapter 324 of 1873.

If a consolidated company, name the constituent companies. Give reference to charters of each and all amendments of same:

Calais and Baring Railroad and Lewy's Island Railroad.

Charter and amendments of Calais and Baring Railroad as above.

Lewy's Island Railroad, Baring to Princeton, sixteen miles, was chartered in 1854, and opened in 1856. It was sold to the Calais and Baring Railroad Company in 1870.

The name of the Calais and Baring Railroad Company was changed in 1870 to St. Croix and Penobscot Railroad Company.

Date and authority for each consolidation? Chapter 363 of the laws of 1870.

ORGANIZATION.

Names of Directors.	Post office Address.	Date of Expiration of Term.

PART IV.

Petitions, Orders of Notice, Decisions of the
Board

AND

Rules of the Board of Commissioners.

1891.

PETITIONS AND DECISIONS OF THE BOARD.

Petition, order of notice and decision of the Board relating to certain highway crossings over Portland & Rochester Railroad, in town of Westbrook. Decision January 10, 1891.

To the Honorable Railroad Commissioners of the State of Maine :

The undersigned, selectmen, being the municipal officers of the town of Westbrook respectfully represent, that on petition of I. F. Quinby, an inhabitant of said town of Westbrook, they duly laid out, on the eleventh day of November, A. D. 1890, a town way in said town as follows, beginning at a stone monument driven in the earth at the point of intersection of the easterly side line of that part of Central street situated on the northerly side of the Portland and Rochester Railroad, and the northerly side line of said railroad, thence southerly and across the land and track of said Portland and Rochester Railroad about one hundred one (101) feet to a stone monument driven in the earth at the point of intersection of the easterly side line of that part of said Central street situated on the southerly side of said railroad, and the southerly side of said railroad. The line described to be the easterly boundary of said way, and said way to be forty-two feet and six (42.6) inches wide on the northerly side of said railroad and fifty (50) feet wide on the southerly side of said railroad and to be situated wholly on the westerly side of said described line.

Which said way has been accepted by said town at a legal meeting of the inhabitants thereof duly notified and held on

the eighth day of December, A. D. 1890, all of which appears upon the books of the clerk of said town. And they further represent that said way crosses the land and track of said Portland and Rochester Railroad Corporation.

They therefore request you to give notice and hearing and determine whether said way shall be permitted to cross such land and track at grade therewith or not, and the manner and condition of crossing the same, and also to determine whether the expense of building and maintaining so much as is within the limits of said railroad shall be borne by said railroad corporation, or by said town of Westbrook, or shall be apportioned between said railroad corporation and said town of Westbrook, and make your report thereon according to the statute in such cases provided.

GEORGE W. LEIGHTON, } Selectmen
MAHLON H. WEBB, } of
HENRY H. B. HAWES, } Westbrook.

On the foregoing petition, ordered, that the petitioner cause to be published a true copy of said petition, and this order of notice thereon, three days successively in the *Portland Daily Press*, a newspaper published at Portland, in the County of Cumberland, the first publication in said paper to be at least seven days before the fifth day of January, A. D. 1891, on which day the Board of Railroad Commissioners will be in session at the selectmen's office in Westbrook at two o'clock in the afternoon for the purposes indicated in said petition.

D. N. MORTLAND, *Chairman.*

For the Board of Railroad Commissioners of Maine.

Dated this 24th day of December, A. D. 1890.

Hearing January 5, 1891. Counsel, William Lyon, for petitioners; F. M. Ray, for Portland and Rochester Railroad.

REPORT AND DECISION OF THE BOARD.

To the Supreme Judicial Court next to be held at Portland in and for the County of Cumberland, on the second Tuesday of January, A. D. 1891.

The Board of Railroad Commissioners hereby certify that in accordance with the foregoing application and order of notice, they met at the time and place mentioned in said order, and it then and there appearing that notice of said hearing had been published as ordered, gave a hearing to the petitioners and all other persons and parties who appeared and desired to be heard relative to same.

At said hearing, it appeared, from evidence given, that the street or way mentioned in said application, as located, crosses the track of the Portland and Rochester Railroad, within a few rods westerly of the passenger station building in the village of Saccarappa; that said street or way, though recently laid out and accepted by the town, has been, for a number of years, used and treated as a public way, and that a grade crossing, at that point, had been permitted and maintained.

After a former hearing, given by the Board, on the ninth day of May last, permission was granted to said town of Westbrook, to locate said way across the land and right of way of the Portland and Rochester Railroad Company, used for station purposes, as provided by section 29 of chapter 18 of the Revised Statutes.

At said former hearing, the Board after carefully considering the rights and convenience of the public and those of the railroad corporation, determined that said street or way should be so laid out; but before determining to permit the location of said way, as aforesaid, the Board carefully examined the premises, and considered the matter as to whether or not such way should be permitted to cross said railroad at grade, or otherwise, and while under the provisions of the statute, no decision could be rendered in respect to it at that time, the Board in fact, then determined that if a way was to be permitted, it would from necessity have to be constructed so as to cross said railroad at grade. Heretofore two grade crossings have been permitted and maintained without authority across said grounds and railroad track, within a short distance of each other.

The Board while reluctant to sanction the location of a way that would from necessity require a permission that it be constructed so as to cross the railroad at grade, felt that it would be better to sanction one legal grade crossing rather than that more should be maintained and used without authority of law, in that locality.

The Board therefore determines and orders that said street, as located, may be constructed so as to cross said railroad location and track at grade therewith, and that the manner and conditions of constructing and maintaining same shall be as follows:

Said Central street shall be constructed and maintained, within the location of the Portland and Rochester Railroad by the Portland and Rochester Railroad Company, so that said street shall cross exactly at grade with said railroad, and the approaches on either side of the track or tracks of said railroad, within its location, shall be made and maintained as wide as said way is now constructed, and in such manner that said crossing shall be safe and convenient for travelers with horses, teams and carriages, and suitable provisions shall also be made for the passage of surface drainage water.

In witness whereof we have hereunto set our hands this tenth day of January, A. D. 1891.

By the Board.

E. C. FARRINGTON, Clerk.

*Petition of the Phillips and Rangeley Railroad Company
to the Board, to determine the manner of crossing a certain
highway on the line of its railroad.*

To the Honorable D. N. Mortland, A. W. Wildes and Roscoe L. Bowers, Railroad Commissioners of the State of Maine.

Respectfully represents the Phillips and Rangeley Railroad Company, a corporation duly established under the laws of

the State of Maine, and having its principal place of business at Phillips, in the County of Franklin, and State of Maine.

That it was incorporated and chartered by act of the Legislature, chapter 545, Private and Special Laws of 1889, approved March first, 1889.

That by the provisions of said charter it was and is authorized and empowered to survey, locate, construct, and operate and maintain a railroad from some convenient point in said town of Phillips, connecting with the Sandy River Railroad; thence extending northerly through the town of Madrid, and Township No. 1, Range 2, Dallas Plantation, to some point in the town of Rangeley all in said Franklin County.

That it has organized under the provisions of its said charter and has surveyed, located and partially constructed its said railroad from where it connects with said Sandy River Railroad in said Phillips to said Rangeley.

That in locating and constructing said railroad, it has become convenient and necessary to cross the highway and town way in said Phillips as follows:

The road leading from the river-road to the dwelling-house of S. W. Parlin at point about ninety rods easterly of said river-road.

That it is not practicable to make said crossing other than at or nearly at a grade with said highway or townway as now maintained.

That said way is infrequently traveled and that it is impossible at any reasonable expense to construct said railroad so as to pass over or under said way.

Therefore the said Phillips and Rangeley Railroad, petition your Honorable Board to view so much of said location and survey as crosses said highway and townway and after due notice to all parties interested and hearing the same to authorize your petitioner to build, construct and maintain its railroad across the said way at or near the present grade thereof, and to fix the manner and determine how said crossing shall be built and maintained and that after said notice, hearing and views you will make and pass such orders and decrees in

the premises as required by the provisions of sections 27 and 28 of chapter 18, R. S. as amended.

Phillips, Maine, December 17, 1890.

Phillips and Rangeley Railroad Company,
by W. A. Rich, President and Manager.

ACTION OF THE BOARD.

At the time the foregoing petition was presented to the Board, the railroad company had entered upon the construction, and had graded its line of railroad in the vicinity of the way mentioned. For these reasons, the Board held that they had no jurisdiction of the subject matter.

E. C. FARRINGTON, Clerk.

January 13, 1891.

Petition of Selectmen of Westbrook, relating to a certain highway crossing over Portland & Rochester Railroad—and action of the Board thereon.

To the Honorable Railroad Commissioners of the State of Maine :

The undersigned, selectmen, being the municipal officers of the town of Westbrook in the County of Cumberland, respectfully represent, that a petition has been presented to them asking for the laying out of a town road in said town of Westbrook, for the use of said town, beginning at the southerly terminus of that part of Mechanic street situated on the northerly side of the Portland and Rochester Railroad as the same is now laid out, thence southerly, and across the land and track of said Portland and Rochester Corporation, to the northerly terminus of that part of said Mechanic street situated on the southerly side of said Portland and Rochester Railroad, as the same is now laid out on the southerly side of said railroad.

And they further represent, that said proposed road will cross the land or right of way of the said Portland and Rochester Railroad Corporation used for station purposes.

They therefore request you to give notice and hearing, and to adjudge whether public convenience and necessity require it.

GEORGE W. LEIGHTON, } Selectmen
MAHLON H. WEBB, } of
HENRY H. B. HAWES, } Westbrook.

ACTION OF THE BOARD.

The subject matter of the foregoing petition having been passed upon by the Board at a former hearing, the same was dismissed.

E. C. FARRINGTON, Clerk.

January 27, 1891.

Petition, Order of Notice, and Action of the Board, relating to the approval of Articles of Association of the Bangor and Aroostook Railroad Company. Approved February 13, 1891.

To the Honorable Railroad Commissioners of the State of Maine.

We, the undersigned, persons named as directors in certain articles of association made and signed, for the purpose of becoming a corporation, to be known as the Bangor and Aroostook Railroad Company, for the purpose of constructing, maintaining and operating a railroad of standard gauge, from a point of junction with the Bangor and Katahdin Iron Works Railway (now under lease to the Bangor and Piscataquis Railroad), in Brownville in Piscataquis County, in State of Maine to the villages of Presque Isle and Ashland, in the County of Aroostook in said State, respectfully ask that the annexed articles of association may be approved.

Dated at Bangor, County of Penobscot and State of Maine, this ninth day of February, A. D. 1891.

C. F. BRAGG,
ALBERT A. BURLEIGH, } Directors.

On the foregoing petition, Ordered, That the petitioner cause to be published a true copy of said petition, and this

order of notice thereon, four days successively in the Bangor Daily Commercial, Bangor Daily Whig & Courier and Bangor Daily News, newspapers published at Bangor in the County of Penobscot, the first publication in each paper to be at least three days before the thirteenth day of February, A. D. 1891, on which day the Board of Railroad Commissioners will be in session at their office in Augusta at two o'clock in the afternoon for the purposes indicated in said petition.

D. N. MORTLAND, *Chairman.*

For the Board of Railroad Commissioners of Maine.

Dated this ninth day of February, A. D. 1891.

ARTICLES OF ASSOCIATION ; ANNEXED.

Know all men by these presents :

That we, the subscribers hereto, a majority of whom are citizens of the State of Maine hereby associate ourselves together, to form a company under the name of, Bangor and Aroostook Railroad Company for the purpose of constructing, maintaining and operating a railroad for public use in the conveyance of persons and property within the State of Maine, and each of us hereby agree to take the number of shares in said company set against his signature hereto.

The gauge of said railroad is to be four feet eight and one-half inches ; said railroad is to be constructed, maintained and operated, from a point of junction with the Bangor and Katahdin Iron Works Railway (now under lease to Bangor and Piscataquis Railroad) in Brownville in Piscataquis County in said State of Maine to the village of Presque Isle in Aroostook County in said State, also from a point of junction with said line from said Brownville to said Presque Isle, in the plantation of Dyer Brook in said Aroostook County to the village of Ashland in said Aroostook County ; the length of said railroad as near as may be, is for the first mentioned line from Brownville to the village of Presque Isle, one hundred and thirty-five miles, and for the other line from said Dyer Brook plantation to said village of Ashland of forty miles ; the names of the towns and plantations, through which

or into which said railroad is to be made are for first mentioned line, Brownville, Townships five, Range nine, North Waldo patent, Township four Range nine, North Waldo patent, all in said Piscataquis County ; Township A Range eight and nine West from East line of State, Township No. three Indian purchase, Township one Range seven West from East line of State, Township two Range seven West from East line of State, Township two Range six West from East line of State, Staceyville plantation, all in Penobscot County in said State ; Sherman in said Aroostook County, Patten in said Penobscot County ; Crystal plantation, Island Falls, Dyer Brook plantation, Oakfield plantation, New Limerick, Houlton, Littleton, Monticello, Bridgewater, Blaine, Mars Hill, Easton, and Presque Isle, all in said Aroostook County ; and for second mentioned line Dyer Brook plantation, Merrill plantation, Moro plantation, Township seven Range four West from East line of State.

Township eight Range four West from East line of State, Township nine Range four West from East line of State, Township nine Range five West from East line of State, Masardis and Ashland, all in said Aroostook County ; the amount of capital stock of said company is to be one million and fifty thousand dollars, divided into ten thousand five hundred shares of one hundred dollars each.

Albert A. Burleigh of Houlton, Aroostook County, Maine, and Charles A. Gibson, Hiram H. Fogg, Frederick H. Appleton and Charles F. Bragg, all of Bangor in said Penobscot County are five persons, all citizens of the State of Maine, who will act as directors of said company and manage its affairs until others are chosen in their places.

Dated this sixth day of February, A. D. 1891.

AUGUSTA, February 13, 1891.

Petition, Order of Notice, and decision of the Board, relating to approval of the Articles of Association of the Belfast Street Railway Company. Approved March 11, 1891.

BELFAST STREET RAILWAY COMPANY.

We, the undersigned, hereby associate ourselves to form a company for the purpose of constructing, maintaining and operating a railroad for public use in the conveyance of per-

sons and property within the State of Maine, in accordance with chapter fifty-one of the Revised Statutes and amendments thereto, and for that purpose hereby make and sign the following articles of association, viz:

1. The name of said company is the Belfast Street Railway Company.

2. The gauge of the road is to be four feet eight and a half inches.

3. The places from which and to which said road is to be constructed, maintained and operated, are from a point at or near the Post Office in Belfast, to a point at or near the Camp Ground, so called in Northport; said railway to run upon and over the streets, highways and town ways of said Belfast and Northport, and to be operated by electricity.

4. The length of said road as nearly as may be, is three and one-half miles.

5. The names of each town and county in the State through which or into which said road is to be made are Belfast and Northport, both in the County of Waldo.

6. The amount of capital stock is twenty-one thousand dollars.

7. The number of shares of which said stock consists is two hundred and ten.

8. The names and places of residence of the persons who shall act as directors of the proposed company, and manage its affairs until others are chosen in their places, are Robert F. Peirce, Percy C. Peirce, and Joseph Williamson, all of said Belfast, and Thomas T. Robinson of Dedham, and W. B. Furgerson of Malden, both in the Commonwealth of Massachusetts.

Dated this twenty-fourth day of February, 1891.

ACTION OF THE BOARD.

We, the undersigned Board of Railroad Commissioners for the State of Maine, having carefully examined the within articles of association, and after a public hearing thereon, being satisfied that all of the provisions of chapter fifty-one of the Revised Statutes have been complied with, hereby approve and endorse the same.

By the Board.
E. C. FARRINGTON, *Clerk.*
March 11, 1891.

*Petition, Order of Notice and Decision of the Board, relating
to a certain highway crossing in the town of Passadumkeag.
Decision April 25, 1891.*

STATE OF MAINE.

To the Honorable Railroad Commissioners of the State aforesaid.

The undersigned, selectmen of the town of Passadumkeag, in the County of Penobscot, and State of Maine, respectfully represent, that previously to the laying out or construction of the railroad hereinafter mentioned, a street was laid out through the village of Passadumkeag, known as Union street, crossing the public highway leading to Burlington and known as Burlington street, which highway was also laid out and constructed long before said railroad was laid out or established,—that after both said ways were laid out, the European and North American Railway was laid out and established and constructed, so as to cross both of said streets near their junction with each other,—that recently said Union street has been made up to the point where said railroad crosses it, and it is desired to make the same still further and across the railroad and thus extend it in accordance with its original laying out. The elevated character of the railroad at the point of crossing is however such as to require a large additional expense to be incurred for its construction beyond what would be the cost if no such railroad track existed there. Wherefore your petitioners claim that said railway of the Maine Central Railroad Company, its lessee and operator of said railroad shall make and complete said street or highway within the limits of the railway, and that the expense thereof shall be borne by said principal corporation or its lessee aforesaid, and the said companies have been accordingly requested to do such work and thus make the way passable, all which they neglect and refuse to do.

Whereupon the selectmen, municipal officers aforesaid of said town of Passadumkeag, respectfully request you, the said

Railroad Commissioners, after proper notice to the parties aforesaid interested in the matter, and especially the Maine Central Railroad Company, lessee and operator of the railroad as aforesaid and hearing, to examine the premises, and thereupon determine whether the way or street aforesaid shall be permitted to cross the track of said railroad at grade therewith or not, or under or over the same, and also the manner and condition of crossing the same, and the expense of building and maintaining so much thereof as is within the limits of such railroad, and whether the same shall be borne by such railroad company or its lessee aforesaid, or by the town aforesaid, or whether the same shall be apportioned between such companies or one of them and said town, and thereupon to make their said commissioners' report of their determination, and to take such further proceedings as are by statute in such cases provided.

All of which is respectfully submitted by the undersigned, selectmen aforesaid, on this fifth day of December, 1890.

C. L. HATHAWAY, } Selectmen
J. W. DENNIS, } of
Wm. LEONARD, } Passadumkeag.

On the foregoing petition, ordered, that the petitioners cause to be published a true copy of said petition, and this order of notice thereon, four days successively in the *Daily Commercial*, a newspaper published at Bangor in the County of Penobscot the first publication in said paper to be at least seven days before the eighth day of April, A. D. 1891, on which day the Board of Railroad Commissioners will view the location of said proposed way, and will be in session at the depot of the Maine Central Railroad in Passadumkeag, at nine o'clock in the forenoon for the purposes indicated in said petition.

D. N. MORTLAND, *Chairman.*

For the Board of Railroad Commissioners of Maine.

Dated this 28th day of March, A. D. 1891.

REPORT AND DECISION OF THE BOARD.

To the Supreme Judicial Court next to be held at Bangor in the County of Penobscot, on the first Tuesday of October, A. D. 1891.

The petitioners, the selectmen of the town of Passadumkeag, on the fifth day of December, A. D. 1890, presented to the Board, the foregoing application; but owing to the season of the year and the depth of the snow in the locality of said proposed crossing, which would prevent an inspection of the same, the Board determined to delay action thereon until a more perfect view and inspection of the locality could be obtained.

On the twenty-eighth day of March, A. D. 1891, the Board appointed Tuesday the eighth day of April, A. D. 1891, and the depot of the Main Central Railroad, in Passadumkeag, as the time and place for a hearing thereon as provided by law, and as appears by the foregoing, ordered the petitioners to cause notice thereof to be given by publishing a true copy of said petition and their order thereon, four days successively in the *Daily Commercial*, a newspaper published at Bangor in said county.

On said day, the Board met at the time and place appointed, and after viewing the locality of the proposed crossing, gave a hearing to the petitioners and all other persons who appeared and desired to be heard relative to the same. From the evidence adduced at said hearing, it appeared that some time prior to the construction of the European and North American Railway, now leased and operated by the Maine Central Railroad Company, a street or way was laid out through the village of Passadumkeag, called Union street, which as then laid out, extended from the highway near the river, easterly across a highway known as Burlington street, in said village; that since said laying out, the portion of said street leading easterly from a junction with said Burlington street, has been constructed; that until during the past year, no attempt has been made by the inhabitants of said town, to open or con-

struct said way across Burlington street or the portion lying westerly thereof. Since said street was laid out as above stated, the European and North American Railway has been constructed and crosses said Burlington street diagonally, to the point where said Union street, as located, would cross Burlington street. It also appeared that within the past two years, the Maine Central Railroad Company, which, as lessee, is now operating the European and North American Railway, has erected a depot near where Burlington street crosses said railroad, by reason of which erection and maintenance, said Burlington street crossing is now within the grounds used for station purposes by said railroad company.

The petitioners assume that, having first located a way across the grounds over which a railroad has since been constructed, their right to such location is paramount to that of the railroad company, though they had failed to construct the same for more than six years since such location was filed; therefore the petitioners do not ask the Board for permission to locate a street or way across said railroad track; but assume that they now have a right of way established, and ask the Board to determine the manner and conditions of simply how such a crossing may be made.

This Board cannot concur in the view of the law taken by the petitioners. While it does not clearly appear just when the location of Union street was made and accepted by the town, it is clear that it was done, if at all, prior to the location and construction of the railroad, and said railroad has been constructed and in operation through that village nearly twenty years.

Section 36, chapter 18, Revised Statutes, provides that "when a town way, private way, or highway is wholly or partly discontinued by the commissioners, a time shall be fixed for it. And when laid out by them, the way shall be regarded as discontinued, if not opened within six years from the time allowed therefor." Though this way, so far as appears, may not have been laid out by the county commis-

sioners, and might not for that reason, be regarded as discontinued, still a failure to construct the way for more than twenty years after such laying out, renders it, at least, doubtful whether the town has now any rights under such proceedings, and if not, the Board would have no jurisdiction to determine the manner and conditions such a way should cross the location of a railroad legally established, and we would say further, the Board would be reluctant to assume jurisdiction in this case, if we found the facts to be as set forth in the petitioners application.

The Board, from an inspection of the location and from the evidence adduced at said hearing, finds that in fact Burlington street, so called, crosses said railroad at grade, at the point mentioned in the application ; that the way called Union street, which the petitioners purpose to construct, by its location, simply intersects with Burlington street at that point, and in constructing said Union street, no additional crossing of the railroad will be required, though to facilitate travel to and from the crossing now established at that point, a portion of the railroad location, on the westerly side, will have to be appropriated to make the approaches thereto.

A crossing from Union street, on the easterly side of said railroad is now legally established and existing.

Under this petition, we think that the Board may determine the manner and conditions, under which such crossing may be enlarged or extended across an additional portion of the railroad location. We think, too, that it is reasonable and proper to permit it to be done.

Therefore the Board determines and orders that said street or way may be extended westerly from the track of said railroad, across a portion of the railroad location, as said street or way is now located, and the manner and conditions of constructing and maintaining such crossing, shall be as follows : Said street or way shall be constructed and maintained within the location of said railroad, by the Maine Central Railroad Company ; said street when completed shall not be less than two rods in width, and the approaches toward said railroad

track shall not be steeper than one foot elevation to every twenty feet out from said track.

Said railroad company shall place and maintain suitable planking between the rails of the track and the approaches thereto, but said planking shall not extend northerly, more than ten feet from the center of said street as now located.

In witness whereof, we have hereunto set our hands this twenty-fifth day of April, A. D. 1891.

By the Board.

E. C. FARRINGTON, Clerk.

Petition of Zig-Zag Railroad Company, Peaks Island, for change of Gauge, and action of the Board thereon.

To the Honorable Railroad Commissioners of the State of Maine.

GENTLEMEN: At a meeting called for the purpose, it was moved and carried that the gauge of the Zig-Zag Railroad be changed to the standard gauge, from three feet and six inches, to four feet eight and one half inches, and we do hereby request and pray your Honorable body to grant us permission to build the Zig-Zag Railroad the standard guage.

Please grant an immediate decision as we must sign papers to complete contract on the eighth instant.

MAY CHAPMAN, President.

JOHN H. HUMPHREY, } Directors of
CHARLES H. CHASE, } Zig-Zag Railroad.

ACTION OF THE BOARD.

The foregoing petition not complying with the provisions of law was dismissed.

E. C. FARRINGTON, Clerk.

June 5, 1891.

Petition, Order of Notice and Decisions of the Board Relating to certain highway crossings, over the M. C. R. R., in the town of Fairfield. Decision July 17, 1891.

To the Honorable Railroad Commissioners of the State of Maine.

The undersigned, selectmen of the town of Fairfield, the County of Somerset, respectfully represent that a town way has been laid out in said town as follows:

Beginning on the west line of Main street in Fairfield village in said town, at a point about ten rods and fifteen feet north of the southeast corner of F. P. Wing's dwelling-house lot and running north fifty-seven degrees west, thirty-eight rods five and one-half feet to the southeast corner of land of J. E. Cotton; thence north sixty degrees west, ten rods to the east line of High street; said course being the north line of said way, which said way runs across the land, location and right of way of the Maine Central Railroad Company, used for station purposes.

And the selectmen aforesaid further represent that a town way has been laid out in said Fairfield as follows:

Beginning at a point on the road leading from the Benjamin Burrill place (so called) to Shawmut village in said town one hundred and thirty-three feet north of the northeast corner of Albert Jewell's homestead lot, and running east fifty degrees south one hundred and fifty feet; thence south sixty-two degrees east sixty-eight rods and six inches, said way crossing the track of the Maine Central Railroad Company, and laying in the south side of said course.

They therefore request you to give notice and hearing and adjudge whether public convenience and necessity require the laying out of said ways, and to determine further whether said ways shall be permitted to cross the track or tracks of the Maine Central Railroad Company at grade therewith or not; and the manner and condition of crossing the same, and

how the expense of building so much of said ways as is within the limits of said railroad shall be borne.

D. C. HALL,
W.M. VALENTINE,
OWEN G. FLOOD, } Selectmen
of
Fairfield.

FAIRFIELD, MAINE, May 29th, 1891.

On the foregoing petition, ordered, that the petitioner cause to be published a true copy of said petition, and this order of notice thereon, one week in the *Fairfield Journal*, a newspaper published at Fairfield, in the County of Somerset, the first publication to be at least seven days before the fourteenth day of July, A. D. 1891, on which day the Board of Railroad Commissioners will be in session at the office of George G. Weeks in Fairfield at ten o'clock in the forenoon for the purposes indicated in said petition.

D. N. MORTLAND, *Chairman.*

For the Board of Railroad Commissioners of Maine.

Dated this 6th day of July, A. D. 1891.

REPORT AND DECISION OF THE BOARD.

To the Supreme Judicial Court next to be held at Skowhegan, on the third Tuesday of September, A. D. 1891.

In accordance with the foregoing application and order of notice, the Board met at the time and place mentioned in said order and, finding that notice had been published as ordered, after viewing the locations of the crossings mentioned in said application, gave a hearing to the petitioners and all others who desired to be heard relative to same.

By the view and evidence elicited at said hearing, the Board finds the facts, as to the first named street or way to be as follows:—

A street or way has been laid out and accepted by the town, starting from the westerly side of Main street in the village of Fairfield; thence westerly across the location and track formerly of the Kennebec and Somerset Railroad, now owned and operated by the Maine Central Railroad Company,

and continuing across the location and tracks of the Maine Central Railroad to High street in said village, a distance of about forty-eight rods in all; that a large portion of the distance above mentioned is across the lands and locations of the railroad aforesaid; that if said street or way is constructed, as laid out, it must cross not only "the land, location and right of way of the Maine Central Railroad," as set forth in said petition, but also the track and location of the Kennebec and Somerset Railroad now owned and operated by the Maine Central Railroad Company as a spur track, all of which are within the yard limits and used by said company for station purposes; that the two tracks above mentioned, at the point where said street or way would cross, are in the vicinity of one hundred feet apart, and all of the intervening space is owned by the Maine Central Railroad Company, and necessary for use for side tracks, buildings and other station purposes.

Section twenty-nine of chapter eighteen of the Revised Statutes is as follows:—

"No way shall be laid out through or across any land or right of way of any railroad corporation, used for station purposes, unless after notice and hearing, the Railroad Commissioners adjudge that public convenience and necessity require it."

It appeared from the evidence elicited at the hearing, that all of the land over which this contemplated street or way is laid out, other than that of the railroad corporation, belongs to one individual; that the two highways, viz: Main street and High street, above mentioned, run parallel with the tracks of the railroad and intersect with each other a short distance southerly of the contemplated way, and that another street connects these two streets near the station of the railroad company. This contemplated way, if constructed, at all, would from necessity, have to cross the two tracks of the railroad above mentioned, at grade, and each within the yard limits of the railroad, where trains and locomotive must frequently pass to and fro, shifting and making up trains. The owner of the land, on either side of the railroad, claims that

he has a right of way across the track or tracks of the railroad corporation, in the vicinity of this contemplated street, the use of which he has been deprived by the corporation, and this fact is given as one reason why a public way should be permitted.

It is further claimed that, by reason of such private right of way and by reason of the partial construction of the public way on either side of the railroad, which has to some extent been used by the public as a crossing, its location and approval as a public way, has become a necessity.

That the construction of this way as contemplated, would convene the owner of the estate above described, in passing from one portion of his estate to the other, and that more or less of the public would be convenience, by having a more direct road to and from certain points in that vicinity, there can be little doubt; but these reasons are hardly sufficient to convince the Board of Railroad Commissioners that public convenience and necessity require it to be laid out and constructed, as prayed for.

The statute above quoted was intended to prevent the unnecessary laying out of streets or ways over territory used by railroad companies for station purposes. The law requires that more than the mere convenience of a few individuals should be subserved, by permitting ways to be so laid out and constructed. It requires that such ways should be found to be a public necessity as well as a convenience.

The Board cannot deem the way asked for here, to be a public necessity, or even that public convenience requires its construction. We doubt that if either public or private interests would be subserved by permitting it. The danger to passers on this way, either on foot or in teams, would be imminent at all times. We therefore, adjudge that public convenience and necessity does not require the laying out of said way across the land, location and rights of way of the Maine Central Railroad, used for station purposes, as prayed for in said application, and the prayer of the petitioners, in that respect, is hereby denied.

In respect to so much of the petitioners' application as relates to the crossing near Shawmut village in said town of Fairfield, the Board, after careful consideration of all the facts presented by the petitioners and others relative to same, feel compelled, at this time, to say that they see no valid reason why a crossing at grade of the railroad, at that point, should be allowed. It may be that public exigencies required the laying out of this street. The selectmen of the town have so found, and that fact is wholly within their province; but the statute provides that this Board "shall upon notice and hearing determine whether the way shall be permitted to cross such track at grade or not."

The obvious intent of the Legislature in enacting the statute, partially quoted above, was to discourage or prevent additional crossings, in this State at grade. This object, however, cannot be accomplished if towns and cities continue to persist in laying out streets and ways in such localities and in such manner that a crossing cannot reasonably be made other than at grade.

To our minds there seems to be no valid reason why this way should, at this time, be laid out at all. There are no buildings, or inhabitants living on the line of this street or way, and may not be for years to come. Certainly the Board could make no reasonable excuse for permitting a dangerous grade crossing for the benefit of those who might travel that way simply for pleasure.

As it is not probable that the town will desire to open said way, except to cross at grade, we do not deem it necessary to determine the manner and conditions said way may cross otherwise than at grade.

However, if the petitioners should desire such a determination, this report can be recommitted, or sent to a new commission as provided by law.

In witness whereof, we have hereunto set our hands this seventeenth day of July, A. D. 1891.

By the Board.

E. C. FARRINGTON, *Clerk.*

Petition, order of notice and decision of the Board relating to a certain highway crossing over the Maine Central Railroad in the town of Wales. Decision October 24, 1891.

To the Honorable Railroad Commissioners of the State of Maine.

The undersigned, selectmen of the town of Wales, in the County of Androscoggin, respectfully represent that a county road has been laid out in the town of Greene and Wales, and so much of said location as is located in said town of Wales is described as follows:

Beginning at a point on the boundary line between the towns of Greene and Wales, thence south thirty and one-fourth degrees east seventeen rods and ten links to the westerly side of the Maine Central Railroad, thence south fifty and one-half degrees east, four and one-half rods, across said railroad, thence same course, sixty-five rods to a point on Alden Moulton's land, thence south nearly sixty-three degrees east, the distance of one hundred and seventy-eight rods to a point one rod northerly of John S. Webster's land, thence south, fifty-four degrees and twenty minutes east, about twelve rods to the pond road, so-called in said town of Wales. We therefore request you to give notice and hearing, and to determine whether said way shall be permitted to cross the track or tracks of the Maine Central Railroad Company at grade therewith or not, and the manner and condition of crossing the same and how the expense of building so much of said way as is within the limits of said railroad shall be borne.

F. E. MARR,
ALDEN MOULTON,
EUGENE HAM,

} Selectmen
of
Wales.

WALES, ME., August 29, 1891.

On the foregoing petition, ordered, that the petitioner cause to be published a true copy of said petition, and this order of notice thereon, four days successively in the *Lewiston Evening Journal*, a newspaper published at Lewiston, in the County of Androscoggin, the first publication in said paper to

be at least four days before the second day of October, A. D. 1891, on which day the Board of Railroad Commissioners will view the location and be in session at the house of Alden Moulton in Wales, at three o'clock in the afternoon for the purposes indicated in said petition.

D. N. MORTLAND, *Chairman.*

For the Board of Railroad Commissioners of Maine.

Dated this 23d day of September, A. D. 1891.

REPORT AND DECISION OF THE BOARD.

To the Supreme Judicial Court, next to be held at Auburn, on the third Tuesday of January, A. D. 1892.

As appears by the foregoing, a highway leading from a point in the town of Greene, to a point in the town of Wales, has been legally laid out and established, which, by its location, crosses the track of the Maine Central Railroad, in the town of Wales, and the selectmen of said town, by their petition, now ask to have the manner and conditions said way may cross said railroad, determined as provided by law.

On the reception of said petition, the Board appointed the second day of October, A. D. 1891, at three o'clock in the afternoon and the house of Alden Moulton in Wales, as the time and place for a hearing on same, and ordered notice thereof to be published, as appears by the foregoing order.

On said day the Board met at the time and place mentioned, and it then and there appearing that notice had been published as ordered, gave a hearing to the petitioners, no other persons or parties appearing. At said hearing it appeared that the way mentioned had been constructed on each side of the railroad location; that the land on each side of the railroad, where said way crosses, is comparatively level; that the section of country through which said way is located, is sparsely settled, and as appears, the travel on said way will be light and infrequent for many years to come if not always.

For these reasons, the Board does not deem it unreasonable to permit said way to be constructed so as to cross said railroad track at grade therewith.

The Board therefore determines that said highway may be constructed so as to cross said railroad track at grade, and that the manner and conditions of such crossing shall be as follows:

So much of said highway as shall be within the location of the Maine Central Railroad shall be constructed by the Maine Central Railroad Company, and shall be as wide as said highway is now constructed on either side of said railroad location. The surface of the approaches on either side of the railroad track shall be made and maintained so that the same shall not be steeper than one foot elevation for every twenty feet out from said railroad track.

Said railroad company shall make and maintain said highway within its location, safe and convenient for travelers on said highway, with horses, teams and carriages, and also shall make suitable provisions for the passage of surface drainage.

In witness whereof we hereunto set our hands this fourteenth day of October, A. D. 1891.

By the Board.

E. C. FARRINGTON, Clerk.

Petition, Order of Notice, and Decision of the Board, relating to the approval of location of the Belfast Street Railway Company. Decision November 10, 1891.

To the Honorable Board of Railroad Commissioners of State of Maine.

The Belfast Street Railway Company, a corporation duly organized under the provisions of sections one to five inclusive of chapter fifty-one of the Revised Statutes, before commencing the construction of its road, respectfully prays for approval of location of said road, in accordance with the map

of the proposed route and with the profile of the line, and with the report and estimate prepared by the engineer from actual survey, which accompany this petition.

Dated at Belfast this first day of October, A. D. 1891,
The Belfast Street Railway Company,

By R. F. PEIRCE, President.

On the foregoing petition, ordered: That the petitioner cause to be published a true copy of said petition, and this order of notice thereon, two weeks successively in the Republican Journal, a newspaper published at Belfast in the County of Waldo, the first publication in said paper to be at least seven days before the 24th day of October, A. D. 1891, on which day the Board of Railroad Commissioners will be in session at the Court House in Belfast at nine o'clock in the forenoon for the purposes indicated in said petition.

D. N. MORTLAND, *Chairman.*

For the Board of Railroad Commissioners of Maine.

Dated this sixth day of October, A. D. 1891.

REPORT AND DECISION OF THE BOARD.

As appears by the foregoing, the petitioner, a railroad corporation organized and incorporated under the provisions of sections one to five, inclusive, of chapter fifty-one of the Revised Statutes, having made a location of its proposed railroad and having presented to the Board a map on an appropriate scale and a profile thereof, together with a report and estimate prepared by a skillful engineer from actual survey, now ask the approval of the Board as provided by section six of said chapter.

At the time appointed by the foregoing order for the hearing, the Board met and made an inspection of the route of location and gave a hearing to the petitioners and all others who appeared and desired to be heard relative to same.

From an inspection of the route and evidence submitted, it appeared that the road, as located, is to extend from a point

at the intersection of Church and Main streets in the city of Belfast; thence to extend southerly in the center of said Church street to the avenue leading to Northport; thence on the easterly side of the traveled way thereof, to a way in said Northport leading southeasterly from said avenue; thence on the easterly side of the way aforesaid and into the Camp Ground in Northport to a point near the "Ruggles House," on said ground. It also appeared that at and near the point above named, a village of no inconsiderable size, has sprung up within the past ten or twenty years, and is now one of the most prominent and flourishing summer resorts along the coast of Maine. A very large number of cottages have been erected in that vicinity, and thousands of people make it their dwelling place during the summer months.

The distance from this point to the city of Belfast, is but about three miles. Section 6 of Chapter 51 of the Revised Statutes above mentioned, provides that "If the Board of Railroad Commissioners, after hearing the petition, approves the proposed location, and finds that public convenience requires the construction of such road, the corporation may proceed with the construction thereof."

From the above statement of facts, which appeared from an inspection and the evidence adduced at the hearing aforesaid, the Board cannot doubt that public convenience will be subserved by the construction and operation of the proposed road.

At said hearing, it further appeared that the city of Belfast and the town of Northport had given to the corporation permission to construct its railroad as located.

We therefore find, adjudge and determine that public convenience requires the construction of said railroad, and we do hereby approve the location of same, as appears by the plans herewith submitted, and this day approved by us.

In witness whereof we have hereunto set our hands this tenth day of November, A. D. 1891.

By the Board.

E. C. FARRINGTON, *Clerk.*

Petition, Order of Notice, and Action of the Board relating to an increase of capital stock of the Phillips and Rangeley Railroad Company. Approved, November, 10, 1891.

To the Honorable D. N. Mortland, A. W. Wildes and Roscoe L. Bowers, Railroad Commissioners of the State of Maine :

Respectfully represents, the Phillips and Rangeley Railroad Company, a corporation duly established by law and having its office and principal place of business at Phillips, in the county of Franklin and State of Maine, that it was organized under the provisions of chapter 545 of the Private and Special Laws A. D. 1889 of the State of Maine ; that acting under the authority granted it in section four, of said act, at a meeting of the stockholders of the corporation, held at Phillips, February 4th, A. D. 1890, the capital stock of the company was fixed at seventy-five thousand dollars ; that at a meeting of the stockholders duly called and held October 21st, A. D. 1891, it was voted to increase the capital stock of the corporation to one thousand shares at the par value of one hundred dollars each, being in all the sum of one hundred thousand dollars ; and the treasurer was authorized and directed to make application, in behalf of the corporation to the Railroad Commissioners of the State of Maine for their approval of the same, and that the vote is to take effect from and at the time when approved by said commissioners.

Wherefore they respectfully ask your Honorable Board to approve of said increase of the amount of stock to said sum of one hundred thousand dollars as provided in its said charter.

Phillips, Maine, October 22d, A. D. 1891.

Phillips and Rangeley Railroad Company,
By F. E. TIMBERLAKE, Treasurer.

On the foregoing petition, ordered, that the petitioners cause to be published a true copy of said petition, and this order of notice thereon, one week in the *Phillips Phonograph*,

a newspaper published at Phillips in the County of Franklin, the first publication in said paper to be at least four days before the tenth day of November, A. D. 1891, on which day the Board of Railroad Commissioners will be in session at their office at the State House in Augusta at two o'clock in the afternoon for the purposes indicated in said petition.

D. N. MORTLAND, *Chairman.*

For the Board of Railroad Commissioners of Maine.

Dated this 26th day of October, A. D. 1891.

STATE OF MAINE,

RAILROAD COMMISSIONERS' OFFICE.

On the foregoing application, it appearing that notice had been published as ordered, and it further appearing that all of the provisions of section four of chapter 545 of the Private and Special Laws of 1889 have been complied with by the stockholders of said corporation, we the undersigned, Board of Railroad Commissioners hereby approve the action of said stockholders, and permit the capital stock of said corporation to be increased to one thousand shares of the par value of one hundred dollars each amounting in all to the sum of one hundred thousand dollars.

In witness whereof, we have hereunto set our hands this 10th day of November, A. D. 1891.

By the Board.

E. C. FARRINGTON, *Clerk.*

Petition, Order of Notice and Decision of the Board, relating to the extension of the Enfield Branch of the European and North American Railway. Decision, November 24, 1891.

To the Railroad Commissioners of the State of Maine :

The European and North American Railway, a corporation established under the laws of the State of Maine, respectfully

represents that it is desirous of constructing and maintaining a branch railroad track extending from the main line of its present Enfield branch near the mills of the Piscataquis Falls Pulp and Paper Company at Montague so called, in the town of Enfield, to a manufacturing establishment owned and operated by the Howland Falls Paper Company, and that it has made a location of said branch railroad track desired, which location is described as follows:

The center line thereof begins at a stake marked "O" in the center line of the main track of said Enfield branch as at present constructed in said Enfield near said Montague, and runs thence on a curve to the left or southerly of 573-69 feet radius a distance of 870 feet; thence tangent to said curve on a course south 36 degrees, 24 minutes west 1,582 feet; thence on a curve to the right or northerly of 716.78 feet radius 375 feet; thence on a tangent to said curve on a course south 66 degrees, 24 minutes, west 200 feet; thence on a curve to the left or southerly of a radius of 718.78 feet 579 feet. This location is to cover a width of two rods, being one rod on either side of above described line, together with such additional land adjoining as may prove necessary for excavations and embankments.

Said European and North American Railway hereby desires your approval of said location that it may be constructed and maintained under your direction, as provided in section 18 of chapter 51 of the Revised Statutes as amended by chapter 129 of the Public Laws of 1891.

And said European and North American Railway further represents that if said branch track shall be constructed and maintained upon the location aforesaid, it will cross certain town ways in said Enfield, called North Mill and Gilbert streets, and therefore said European and North American Railway respectfully asks that your Honorable Board shall determine the conditions and manner of such crossings and that you will authorize such crossings at grade after due notice and hearing, in accordance with the provisions of sections 27 and 28 of chapter 18 of the Revised Statutes, as

amended by chapter 312 of the Public Laws of 1885, and by chapter 282 of the Public Laws, of 1889.

Wm. A. ALLEN, Civil Engineer.

BANGOR, November 16th, 1891.

European and North American Railway,

By CHARLES P. STETSON, President.

The above petition is concurred in by the corporation operating the said European and North American Railway.

THE MAINE CENTRAL RAILROAD COMPANY.

By PAYSON TUCKER, Vice President and General Manager.

On the foregoing petition, ordered, that the petitioner cause to be published a true copy of said petition, and this order of notice thereon, four days successively in the *Daily Commercial*, a newspaper published at Bangor, in the County of Penobscot, the first publication to be at least five days before the twenty-fourth day of November, A. D. 1891, on which day the Board of Railroad Commissioners will view the location of said proposed way and be in session at the depot of the Maine Central Railroad Company in Enfield at eleven o'clock in the forenoon for the purposes indicated in said petition.

D. N. MORTLAND, Chairman.

For the Board of Railroad Commissioners of Maine.

Dated this 16th day of November, A. D. 1891.

REPORT AND DECISION OF THE BOARD.

The European and North American Railway Company, joined by the Maine Central Railroad Company, now the lessee and operating said railroad, by the foregoing application, represents that they are desirous of constructing and maintaining a branch railroad track from the main line of its present Enfield Branch, near the mills of the Piscataquis Falls Pulp & Paper Company at Montague, so called, in the town of Enfield, to a manufacturing establishment owned and operated by the Howland Falls Paper Company, and

that it has made a location of said branch railroad track etc., and asks the Board to approve such location and that the road, so located, may be constructed and maintained as provided by section 18 of chapter 51 of the Revised Statutes.

On the reception of this application, the Board appointed the twenty-fourth day of November, A. D. 1891, as the time when they would view the location of said proposed way, and the depot of the Maine Central Railroad Company, in Enfield, at eleven o'clock in the forenoon as the time and place for a hearing thereon. And as appears, ordered the petitioners, in writing, to give notice of such hearing, by publishing a true copy of said petition and order of notice thereon, four days successively in the *Daily Commercial*, a newspaper published in Bangor in the County of Penobscot, the first publication in said paper to be at least five days before the day appointed for such hearing. On said day, the Board met and viewed the location of said proposed branch railroad, and at the time and place appointed, gave a hearing to the petitioners and all others who appeared and desired to be heard relative to such location, and the several crossings mentioned in said application. From the view aforesaid and the evidence submitted at said hearing, it appeared that the branch railway, aforesaid had been properly located, and that a manufacturing establishment had been erected at the point named in said application or near the same.

We therefore approve the location of said branch track described in said application and adjudge and determine that the same may be constructed as prayed for by said railway company.

At said hearing, it did not appear that the streets or ways mentioned in said application, had been legally located or accepted by the town of Enfield, therefore the Board determines that they have no jurisdiction in respect to said ways.

In witness whereof, we have hereunto set our hands this twenty-fourth day of November, A. D. 1891.

By the Board.

E. C. FARRINGTON, Clerk.

Petition, Order of Notice and Decision of the Board relating to the crossing of certain highways by the Portland and Rumford Falls Railway. Decision November 30, 1891.

To the Honorable Railroad Commissioners of the State of Maine :

The undersigned, Portland and Rumford Falls Railway, respectfully request that your honorable board will appoint a time for examination, to determine, after notice and hearing, the manner and conditions said railway may cross the following named highways, and how the expense of building and maintaining so much thereof as are within the limit of said railway, shall be borne :

First. Crossing of road north of pulp mill on road to toll bridge in village of Gilbertville, in the town of Canton.

Second. Crossing of county road near the house of Mrs. Ward on Herdsdale Farm, in the town of Canton.

Third. Crossing of town road near Charles Walker's house in town of Canton.

Fourth. Crossing of county road near house of Thomas Reynolds in town of Canton.

Fifth. Crossing of county road near house of Harmon French in town of Canton.

Sixth. Crossing of county road near house of Dana Godding in town of Peru.

Seventh. Crossing of ferry road near Green's ferry in town of Peru.

Eighth. Crossing of ferry road near Brown's ferry in town of Peru.

Ninth. Crossing of ferry road near Hammond's ferry in town of Peru.

Tenth. Crossing of county road near the house of Albert Frost in town of Peru.

Eleventh. Crossing town road near house of Albert Frost in town of Peru.

Twelfth. Crossing of county road at foot of hill near house of Frauk Burgess in town of Peru.

Thirteenth. Crossing of county road near house of J. N. Austin in town of Peru.

Fourteenth. Crossing of road near Rumford line on land of Rumford Falls Power Company in town of Peru.

Portland and Rumford Falls Railway,

By L. L. LINCOLN, Superintendent.

PORLAND, September 3, 1891.

On the foregoing petition, ordered, that the petitioner cause to be published a true copy of said petition, and this order of notice thereon, three days successively in the Lewiston Evening Journal, a newspaper published at Lewiston, in the County of Androscoggin, the first publication in said paper to be at least three days before the tenth day of September, A. D. 1891, on which day the Board of Railroad Commissioners will inspect the locality of said proposed crossings and be in session at the National Hotel in Dixfield at five o'clock in the afternoon for the purposes indicated in said petition.

D. N. MORTLAND, *Chairman.*

For the Board of Railroad Commissioners of Maine.

Dated this fourth day of September, A. D. 1891.

REPORT AND DECISION OF THE BOARD.

To the Supreme Judicial Court next to be held at Paris, in the County of Oxford, on the second Tuesday of February, A. D. 1892 :

As appears from the foregoing petition and order of notice, the Portland & Rumford Falls Railway Company, on the third day of September, A. D. 1891, made application in writing, to the Board to determine the manner and conditions the railway may cross certain highways and townways on the extended line of railway now being constructed as provided by section 28 of chapter 51 of the Revised Statutes.

Upon the reception of said application, the board appointed the tenth day of September, A. D. 1891, at five o'clock in the

afternoon, at the National Hotel in Dixfield, as the time and place for a hearing thereon and ordered the petitioners to give notice thereof, by publishing a true copy of said application and order of notice thereon, three days successively in the *Lewiston Evening Journal*, a newspaper published in Lewiston in the County of Androscoggin, the first publication in said paper, to be at least three days before the day appointed for such hearing. On the day appointed, the Board met and viewed the locations of the several proposed crossings, and at the time and place appointed, gave a hearing to all parties who appeared and desired to be heard relative to same.

From the view aforesaid and the evidence elicited at said hearing, it appeared that the railway, as located, extends from the present terminus in the village of Gilbertville, so called, in the town of Canton, northerly along and near the westerly bank of the Androscoggin river, through the town of Peru to Rumford Falls, on the Androscoggin river. The line of railway, as located, is along a narrow strip of intervalle land bordering on the river, westerly of which is a range of hills and mountains. So far as appears, no route other than the one chosen could have been deemed suitable or practicable, though a highway now extends along said intervalle, which has to be crossed at several points by the railway. Several of these crossings must from necessity be at grade, as neither the highway nor the railway locations can be changed so as to avoid the same.

None of these crossings, however, can be deemed dangerous, as a good view of each can be had from all points on lines of travel. But few of the ways crossed by this line of railway, are much traveled, some of which are merely ways leading from the main highway to ferries.

We therefore determine that all of the crossings mentioned in said application, except one, may be at grade and that the manner and conditions of constructing and maintaining the same, shall be as follows:

1. The crossing of the road north of the pulp mill, leading to the toll bridge, in the village of Gilbertville in the town of

Canton, shall be at grade, after said way, at point of crossing, shall have been lowered one foot below the present grade. Authority to lower the grade of said way, at point of crossing, is hereby granted.

2. The crossing of the county road, near the house of Mrs. Ward, at the Herdsdale farm, so called, in Canton, shall be, when completed, exactly at grade with the highway as now constructed.

3. The crossing of the town road, leading westerly from the highway near the house of Charles Walker in Canton, shall be at grade, after said road or way shall have been raised, at point of crossing, three feet above the present grade, and permission is hereby given to said railway company to raise said road or way, as above provided. The approaches on each side of the railroad track, shall be made and maintained, within the railroad location, by the railroad corporation, and shall be as wide as said way is now constructed, and shall not be steeper than one foot elevation to every twenty feet out from said railroad track.

4. The crossing of the county road near the house of Thomas Reynolds in the town of Canton, shall be at grade, after the grade of said road or way shall have been lowered at point of crossing, one foot and six inches, and said railroad company is hereby granted permission to lower said way as above provided. The railroad company is hereby required to remove all trees and underbrush, on its railroad location, within three hundred feet of said crossing and to procure the removal of all trees and other obstacles that may prevent a sight of said crossing an equal distance therefrom, outside of said location.

5. The crossing of the county road near the house of Harmon French in Canton, shall be at grade, after said way shall have been raised at point of crossing, one foot, and permission is hereby granted to said railroad company to raise the grades as provided. The approaches on either side of the railroad track shall be made and maintained as provided in No. 3.

6. The crossing of the county road near house of Dana Goding, in the town of Peru, shall, when the location of said road or way has been changed at point of crossing, as herein-after provided, be by a bridge to be erected over said road or way, to be located and constructed substantially as shown on plan or print submitted to and this day approved by the Board. Said railroad company is hereby authorized and empowered to change the location of said road or highway, as per said plan shown, and is directed to construct and maintain substantial stone abutments and retaining walls of second-class bridge masonry, on each side of said way, and at such a distance from each other as will give a way for travel of at least twenty feet. Said abutments shall be of sufficient height above said way, to give a space of at least, twelve feet between the grade of the highway aforesaid, and the lower part of the bridge stringers or superstructure to be erected thereon. All of which changes of location, and structures shall be made and maintained by the railroad company aforesaid.

7. The crossing of the road to Green's ferry, in the town of Peru, when the location of said way is changed as contemplated, shall be at grade, and the manner and conditions of constructing and maintaining same, shall be as provided in No. 3.

8. The crossing of the road leading to Brown's ferry, in the town of Peru, shall be at grade, after said way or road shall have been raised, at point of crossing, five feet, and permission is hereby granted to said railroad company to raise the grade of said road as above provided. The manner and conditions of constructing and maintaining same shall be as provided in No. 3.

9. The crossing of the road leading to Hammond's ferry, in the town of Peru, shall be at grade, after said road shall have been raised, at point of crossing, one foot and six inches, and permission is hereby given to said railroad company to raise same as above provided. The manner and conditions of constructing and maintaining same, shall be as provided in No. 3.

10. The crossing of the county road near the house of Albert Frost in Peru, shall be at grade, after said road shall have been raised at point of crossing, nine inches, and permission is hereby granted to said railroad company to raise the grade of same as above provided. The manner and conditions of constructing and maintaining same to be as provided in No. 3.

11. The crossing of the town road near the house of Albert Frost, shall be at grade, after said road shall have been raised, four inches above the present grade of said way, and permission is hereby granted to said railroad company to raise the grade as above provided. The manner and conditions for constructing and maintaining same, shall be as provided in No. 3.

12. The crossing of the county road at the foot of the hill near the house of Frank Burgess in the town of Peru, shall be when completed, exactly at grade with the highway as now constructed.

13. The crossing of the county road near the house of J. H. Austin, shall be at grade, after said way shall have been raised, at point of crossing, two feet, and permission is hereby given to the railroad corporation to raise the grade of said way, as above provided. The slope or approach to the north of the track, shall not be steeper than one foot elevation to every ten feet out from said track. Said railroad company shall make and maintain the approaches on each side of its track, as wide as they are now constructed. Said railroad corporation shall construct and maintain all of the above named crossings and bridge structures, in such manner that each and all of them, shall be safe and convenient for travelers on said ways, with horses, teams and carriages, and shall also make suitable provisions for the passage of surface drainage.

In witness whereof we have hereunto set our hands this thirtieth day of November, A. D. 1891.

By the Board.

E. C. FARRINGTON, Clerk.

Petition, Order of Notice and Decision of the Board, relating to the highway crossing over Canadian Pacific Railway at Greenville. Decision November 30, 1891.

To the Honorable Railroad Commissioners of the State of Maine :

This application of the undersigned municipal officers of the town of Greenville, in said State, respectfully represents that a town way in said Greenville, has been legally laid out across the railroad track of the Canadian Pacific Railroad Company, running through said Greenville, which said town way begins at the southerly line of the road leading from Greenville Village to West Cove, at a point nearly opposite Samuel Cole's house, thence southerly and across said railroad track and ending at the south line of lots numbered 114 and 115 according to plan of W. P. Oakes made in 1883, said road crossing said railroad being three rods wide and being on the easterly side of said line of survey. Said road, to wit: Town way across said railroad, was duly and legally laid out by the selectmen of said Greenville on the sixth day of June, A. D. 1891, upon all necessary legal proceedings thereon, being had and was duly accepted in a town meeting of the legal voters of said Greenville, legally called after the return of said laying out had been filed with the clerk of said town, by a warrant containing an article for the purpose on the eighteenth day of June, A. D. 1891, by all which said proceedings, said way across said railroad was legally established as a town way in said Greenville, but has not yet been constructed. Public convenience and necessity require that said way should be completed and opened for travel forthwith, or as soon as may be legally done. By section 27 of chapter 18 of the Revised Statutes of Maine, as amended by chapter 310 of the Public Laws for the year of our Lord 1885, and as further amended by chapter 282, Public Laws of 1889, it is provided that in such case the expense of building and maintaining so much of such way as is within the limits of such railroad, shall be borne by the railroad company whose track is so crossed.

Now therefore, said municipal officers hereby make application to said railroad commissioners that they upon proper notice to the parties interested, and hearing thereon shall as soon as may be legally done, determine whether the way shall be permitted to cross such track at grade therewith or not, the manner and condition of said crossing and perform all other duties in relation thereto as by the statutes in such case made and provided, and especially as provided by section twenty-seven of chapter eighteen of the Revised Statutes as amended by chapter 310 of the Public Laws of said State for the year 1885, and said chapter 282, Public Laws of 1889, and any other acts amendatory thereof.

Dated at Greenville this nineteenth day of September, A. D. 1891.

LINDLEY H. FOLSOM, } Municipal Officers
WILLIAM L. ROGERS, } of said town of
CHARLES D. SHAW, } Greenville.

On the foregoing petition, ordered, that the petitioner cause to be published a true copy of said petition, and this order of notice thereon, four days successively in the Bangor Daily Whig and Courier, a newspaper published at Bangor, in the County of Penobscot, the first publication in said paper to be at least seven days before the 20th day of October, A. D. 1891, on which day the Board of Railroad Commissioners will view the location of said proposed crossing, and be in session at the Moosehead Inn, in Greenville, at five o'clock in the afternoon for the purposes indicated in said petition.

D. N. MORTLAND, *Chairman.*

For the Board of Railroad Commissioners of Maine.

Dated this sixth day of October, A. D. 1891.

REPORT AND DECISION OF THE BOARD.

To the Supreme and Judicial Court next to be held at Dover, within and for the County of Piscataquis, on the last Tuesday of February, A. D. 1892:

On receipt of the foregoing application, the Board of Railroad Commissioners appointed the twentieth day of October,

A. D. 1891, and the Moosehead Inn in Greenville as the time and place for a hearing thereon and as appears by the foregoing order, required the petitioners to give notice thereof by publishing a true copy of said application and said order of notice, four days successively in the *Bangor Daily Whig and Courier*, a newspaper published at Bangor in the County of Penobscot, the first publication in said paper to be at least seven days before the day appointed for said hearing.

On said day, the Board met at the time and place appointed, and, it then and there appearing that notice had been published as ordered, after viewing the location of said proposed crossing, gave a hearing to the petitioners and all others who appeared and desired to be heard relative to same. After a partial hearing, at the request of the petitioners, the Board adjourned said hearing, to their office in Augusta, to the third day of November, A. D. 1891, at ten o'clock in the forenoon. At the adjourned hearing, which was held at the time and place appointed, the petitioners were represented by Henry Hudson, Esq., and the Canadian Pacific Railroad by C. F. Woodard, Esq.

The Canadian Pacific Railway Company, by its counsel, at that time filed the following answer:

"To the Honorable Board of Railroad Commissioners of the State of Maine, at its session to be holden at Augusta, November 3, 1891 :

The answer of the Canadian Pacific Railway Company to the petition of the municipal officers of the town of Greenville, in the matter of the proposed crossing of said company's railway, by an alleged town way in said Greenville, said petition bearing date nineteenth of September, A. D. 1891.

The said company in the outset submits that the town way described in said petition has not been legally laid out, as in said petition alleged, for the reason, among others, that it has not been accepted in a town meeting legally called by a warrant containing an article for the purpose.

Said company farther denies that public convenience and necessity require that any way near the place described in

said petition should cross said railway at grade, for the reason that a grade crossing in that vicinity would be dangerous, the railway there being near the foot of a long down grade, also near the mouth of a cut, and where the view of a town way would be obscured by trees and bushes.

Such way also at present would lead only to a single house, and access to that house can now be had over a route but little longer and which passes under the railway instead of crossing it at grade.

Said company farther denies that it is by law provided that the expense of building and maintaining so much of such way as is within the limits of the railway shall be borne by the railway company whose track is so crossed, the law being that such cost shall be borne by the town, by the company, or be apportioned between them, as the Railroad Commissioners shall determine, and it is respectfully requested that if the town, has laid or shall lay out a way to give access to a single house only, the town and not the railway company should bear the expense of building and maintaining such way, as well within the limits of the railway location as without.

And said company further makes known to your Honorable Board that the way as described in said petition runs through or across the land or right of way of said railway company used for station purposes, and therefore that the petition to your Honorable Board should not be under the provisions of section 27 of chapter 18 of the Revised Statutes and acts amendatory thereof, but should be under the provisions of section 29 of said chapter 18, and said company further submits that the jurisdiction of your Honorable Board under said section 27 and acts amendatory thereto is entirely different and distinct from its jurisdiction under section 29, and the petition under the one cannot be sustained where the facts show that the petition should have been under the other.

Wherefore said company respectfully prays that said petition shall be dismissed, and that said way shall not be allowed to be constructed.

From the evidence submitted at said hearing, it appeared that the way was regularly laid out by the selectmen of the town that they made a written return of their proceedings, containing the bounds and admeasurements and the damages allowed to each person for land taken, as required by law; that said return was filed with the town clerk on the 6th day of June, 1891; that on the 10th day of June, 1891, a warrant for a town meeting was drawn, signed and posted up as required by law, in which was an article as follows: "To see if the town will vote to accept the road as laid out by the selectmen;" that at said meeting, as appears by the record, the town voted "to accept the road as laid out by the selectmen."

Counsel for the Canadian Pacific Railway Company, in an able argument, contended and, as appears by the answer filed (above quoted) contends:

1st. That the Board of Railroad Commissioners has no jurisdiction of the matter because the road or way "has not been legally laid out, for the reason, among others, that it has not been accepted in a town meeting legally called by a warrant containing an article for that purpose."

2d. "That the way as described in said petition, runs through or across the land or right of way of said railway company used for station purposes," and also claims that in any event said way ought not to be permitted to cross the railway at grade, on account of a descending grade of the railway toward the station and a deep cut at that point where the view is obstructed, etc.

The first question to be decided is whether or not this Board has jurisdiction. It is clear that if the way mentioned in the petitioners application, was not legally established, this Board has no jurisdiction of the subject matter. Railways, town ways and highways must have a legal existence on the face of the earth.

In Re Railroad Commissioners 83 Me. 273. Has the town way mentioned a legal location? As stated above it appears that the way was laid out by the selectmen of the town; that

they made a return of their proceedings and filed the same as required by law.

So far no objection is raised to the proceedings. The point relied upon, by counsel for the railway, to invalidate the proceedings, is that the article in the warrant, above quoted, gave no notice to the inhabitants of the town, of what particular way they were called upon to act, and that the record itself does not show that this particular way was accepted by vote of the town. While we may doubt whether these proceedings of the town were strictly in accordance with the provisions of the statute relating to the laying out of ways, it is not our province or duty to determine that fact. The records of the town show that all of the requirements of the statute have been to a certain extent, complied with. We, therefore, for the purpose of discharging our duties, determine that the way aforesaid has been legally located and accepted by the town. The remaining question affecting the jurisdiction of the Board, is whether or not the town way as located, crosses the land or right of way of the said railway corporation, used for station purposes.

Section 29 of chapter 18, Revised Statutes, is as follows : "No way shall be laid out through or across any land or right of way of any railroad corporation, used for station purposes, unless, after notice and hearing, the Railroad Commissioners adjudge that public convenience and necessity require it." It did not appear from the evidence adduced at the hearing, that the way aforesaid was located through or across the land or right of way of the said railroad corporation used for station purposes. It is true, however, that said way is located inside of the signal or semaphore, which is operated from the railroad station ; but a signal or semaphore set at a certain point does not necessarily prove or even indicate that all of the railway between it and a station building, is used for station purposes.

The town way as located, crosses no lands of the railroad corporation, other than its main line location, neither does it cross any side track or tracks on said location. So far as

appears, there is nothing to indicate, other than the location of the semaphore itself, that the railway, at that point, is used for station purposes.

We think that to hold that all the right of way of a railroad corporation, inside of where a semaphore may be set, is used for station purposes, would be too broad an interpretation of the statute above quoted.

We therefore find that the town way, as located, does not cross the land or right of way of said railway company, used for station purposes.

The town way, as located, cannot reasonably be constructed so as to cross over or under the railway. Ought a crossing at grade at that place, be permitted? We can see no very good reason why it may not. It is not a way that will be much traveled. There is now but one house, on the southern side of the railway, to which access is desired. It is not probable that many more houses will be erected in that vicinity for years to come if ever.

We do not think that a crossing at grade at that point, will be particularly dangerous to those who will have occasion to pass on said street or way.

We therefore determine, permit and order that said way be constructed so as to cross said railway track at grade therewith, and that the manner and conditions of crossing shall be as follows:

Said way shall be constructed and maintained within the limits of the railway location, by said railway company, and the slopes and approaches of said way, toward the track of said railway shall be at least two rods wide, and on the northerly side of said track, not steeper than one foot elevation to every fifteen feet out from said track. Said way, within the location of said railway, shall be constructed in such manner that the same shall be safe and convenient for travelers on said street or way, with horses, teams and carriages, and said railway company shall make and maintain suitable provisions for the passage of surface drainage.

In witness whereof we have hereunto set our hands this
thirtieth day of November, A. D. 1891.

By the Board.

E. C. FARRINGTON, *Clerk.*

Rules of the Board of Commissioners.

1. Regular sessions of the Board will be held at their office on the first Tuesday of each month, at ten o'clock in the forenoon, and when practicable, all hearings on applications to the Board will be held at such regular sessions.
2. All applications to the Board must be in writing and signed by the person making such application, or if a corporation, by its agent or attorney.
3. Applications for approval of articles of association, in organizing railroad corporations under the laws of the State, shall be by petition to the Board, setting forth briefly the formation of such association, its name and gauge and route of the proposed railroad, and such applications shall be signed by one or more of the directors named in the articles of association. Upon reception of such application, a hearing on same shall be appointed, and reasonable notice thereof ordered and published in such newspapers as the Board may designate.
4. When railroads are hereafter constructed across highways or other public ways, application shall be made to the Board, and the manner and conditions of such crossings determined, before corporations shall enter upon the construction of such railroads.
5. Applications or petitions may be presented to the Chairman, or addressed to, or delivered to the Clerk of the Board, at Augusta, Maine.
6. The Clerk of the Board shall keep a Journal of its proceedings and a full and correct record of all petitions and

applications filed, and of all orders and decisions of the Board. Said record shall be open for inspection to all persons interested, and certified copies thereof, on application therefor, shall be furnished by said Clerk for a reasonable compensation.

7. In all hearings the Board will be governed, so far as applicable, by the rules of the Supreme Judicial Court of Maine, and the petitioner or applicant will in all cases be entitled to open and close.
